Making data work for the people you serve

Public bodies face growing pressure to deliver faster, joined-up digital services while managing ageing systems, complex governance, and rising expectations.

At Agile, we help you cut through that complexity.

We modernise your data -improving quality, governance, and interoperability - so you can make confident decisions, deliver digital-first services, and prepare for AI-driven innovation.

Because better data isn't about technology - it's about better outcomes for people.

Why work with Agile?

As an independent consultancy, we help you tackle real-world challenges and deliver meaningful, lasting outcomes for the public.

We believe transformation starts with people and culture, not technology. That's why we take a vendor-agnostic approach - working alongside your teams to design practical, sustainable solutions that fit your mission and scale.

With more than 20 years' experience, we've supported organisations across sectors to modernise their data platforms, strengthen governance, and unlock long-term value responsibly.

How we help

- ▶ Build governance frameworks for ethical, secure data use
- ▶ Conduct maturity assessments to benchmark data and AI readiness
- ▶ Simplify and connect legacy systems
- ▶ Deliver modern platforms for trusted, interoperable data

We help public sector teams turn data into a strategic asset — powering smarter policy, stronger collaboration, and measurable public impact.

Modernise

We help you shape a clear data vision aligned with your public service goals, using the right tools and standards.

Manage

Good data should just work. We ensure your data is clean, connected, and accessible - so the right people get the right information when it matters most.

Maximise

Your data is packed with hidden value. We'll help you uncover it and improve outcomes for citizens.

Semarchy xDM Pricing

Semarchy xDM pricing is based solely on the number of unique 'base objects' being mastered in the software. The license model offers a tiering system from 50,000 base objects upwards to give full transparency on cost both now and in the future when you scale. There are no limits on the number of users, environments or integrations into xDM. xDM pricing is in GBP and excludes VAT.

Number of Base Objects	Annual Subscription (£)	Annual Subscription with 3-year engagement (£)
50,000.00	72540	65520
100,000.00	92430	83070
200,000.00	115830	104130
500,000.00	156780	141570

500,000,000.00	3363800	3030200

Semarchy Data Platform (SDP) Pricing

Semarchy SDP pricing is based solely on the number of Golden Records being mastered in the software. The number of “Golden Records” is the cumulative count of record rows across:

- All entities within the customer’s data model
- All domains, including but not limited to Customers, Suppliers, Employees, Products, Parts, Reference Data, and Sites
- All deployed MDM production instances for on-premise (or self-hosted) deployments (excluding Semarchy SaaS)

The license model offers a tiering system from 100,000 golden records upwards to give full transparency on cost both now and in the future when you scale. SDP pricing is in USD and excludes VAT.

Golden Records	Annual Subscription Self Hosted List Price (\$)	Annual Subscription SaaS List Price (\$)
100000	49725	58500
200000	79560	93600
300000	99450	117000
400000	117352.17	138061.17
500000	133463.07	157015.17
600000	147962.88	174073.77
