Matillion Pricing Model

Pricing for Matillion ETL and Data Productivity Cloud is described below.

Matillion ETL

- It's based on consumption, so you only pay for what you use - 1 Virtual Core Hour = 1 Credit
- One price across all platforms (AWS | Azure | Databricks | GCP | Snowflake)
- Every Edition comes with 5 Users, additional users can be purchased as necessary
- 3 tiers of subscription (Basic | Advanced | Enterprise)
- Per Second charging/hour billing - Credits per Hour - You will be charged for the credit when you reach 60 minutes of usage
- Clients can choose from Pay-Go with monthly billing, Annual Upfront or Annual Monthly
- No charge for Components
- Minimum credit spend (Basic edition: 500 credits a month, Advanced edition: 750 credits a month, Enterprise edition: 1,000 credits a month)

Matillion Data Productivity Cloud

- It's based on consumption, so you only pay for what you use. Credits are consumed by Task Hours. Tasks are created whenever an operation is performed by Matillion. As a pipeline is executed, the main "Run" task is broken down into more granular tasks as the execution continues. Task hours is the combined execution time for each task across Matillion. Each credit can be used for 15 minutes of pipeline execution, meaning 1 Task Hour = 4 credits. Task hours are only charged when running a pipeline. Operations such as validation or sampling are not billed.
- One price across all platforms (AWS | Azure | Databricks | GCP | Snowflake)
- 3 tiers of subscription (Basic | Advanced | Enterprise)
- Basic Edition comes with 5 Users. Advanced and Enterprise editions include unlimited users.
- Per Second charging/hour billing
- Clients can choose from Pay-Go with monthly billing, Annual Upfront or Annual Monthly
- No charge for Components or AI functionality
- Minimum credit spend (Basic edition: 500 credits a month, Advanced edition: 750 credits a month, Enterprise edition: 1,000 credits a month)
