

Mobile Connect for Webex Go

Pure IP's Mobile Connect for Webex Go enables seamless integration of Webex Calling numbers directly into any mobile device, providing a secure, app-free calling experience. This solution is ideal for businesses adopting a Bring Your Own Device (BYOD) model, ensuring mobile and remote workers remain connected through their business numbers without compromising security or compliance.

What is it?

Mobile Connect for Webex Go extends Webex Calling services to personal or company-owned mobile devices. By leveraging Pure IP as a Certified Webex Mobile Provider, users can make and receive business calls using the mobile native dialer and your Webex Calling number, all managed centrally through the Webex Control Hub. This integration offers a flexible and cost-effective solution for incorporating non-desk-based personnel into your organization's communication network.

How it works

Mobile Connect for Webex Go operates by linking your Webex Calling number to an eSIM provisioned on your mobile device. This setup allows business calls to be made and received through your phone's native dialer, ensuring a seamless user experience. All communications are routed through the Webex Calling platform, enabling centralized management and compliance recording if required.

Key features

- **Native mobile integration:**
Make and receive business calls directly from your mobile device using your Webex Calling number, without the need for additional apps.
- **Secure BYOD support:**
Safely enable employees to use personal devices for business communications, maintaining a clear separation between personal and professional calls.
- **Centralized management:**
Utilize the Webex Control Hub for streamlined administration of all connected devices, ensuring consistent application of call routing policies and compliance measures.
- **Global coverage:**
Benefit from Pure IP's extensive global voice network, providing reliable connectivity and support across multiple regions.

"We're excited to expand our partnership with Pure IP. As a Certified Mobile Calling Provider for Webex Go, Pure IP will provide Webex customers with more choice and flexibility for mobile compliant calling."

- Amey Parandekar, VP of Product Management at Cisco

Prerequisites

To implement Mobile Connect for Webex Go, ensure the following:

Webex Calling Professional License:

Users must have a Webex Calling Professional License

Certified Mobile Calling Provider:

Select Pure IP as your provider to facilitate the integration.

eSIM-compatible mobile device:

Users need a mobile device that supports eSIM technology.

Webex Control Hub access:

Administrators require access for device and number management.

Why choose Mobile Connect for Webex Go?

- **Cost efficiency:** Eliminate the need for company-issued mobile devices by enabling secure use of personal phones for business purposes.
- **App-free experience:** Provide users with a familiar calling experience through their device's native dialer, reducing reliance on additional applications.
- **Privacy assurance:** Maintain a clear distinction between personal and business communications, ensuring privacy and compliance.
- **Simplified deployment:** Quickly provision services through eSIM technology and centralized management, minimizing setup time and administrative overhead.
- **Unified communication:** Ensure a consistent user experience across all devices, enhancing collaboration and productivity within your organization.

Certified Webex Calling expertise

Trusted Cloud Connect partner

As a Certified Calling Provider for Webex Calling on Cloud Connect, Pure IP delivers compliant, enterprise-grade PSTN replacement services in more countries than any other provider in the program. Our global coverage ensures seamless, scalable, and reliable voice connectivity.

Comprehensive support, every step of the way

From initial planning to deployment and ongoing management, we provide hands-on support throughout your telephony journey. With 24/7 service and proactive monitoring, we ensure your communications remain reliable and stress-free.

Expertise in complex voice projects

With extensive experience supporting large-scale voice migrations and integrating legacy systems, Pure IP is trusted to handle even the most challenging deployments. Our expertise ensures a smooth transition to Webex Calling, no matter how complex the requirements.
