

Simplify Microsoft 365 Change Management with ChangePilot

Stay on top of Microsoft 365 updates with ChangePilot, powered by Empowering.Cloud.

What is it?

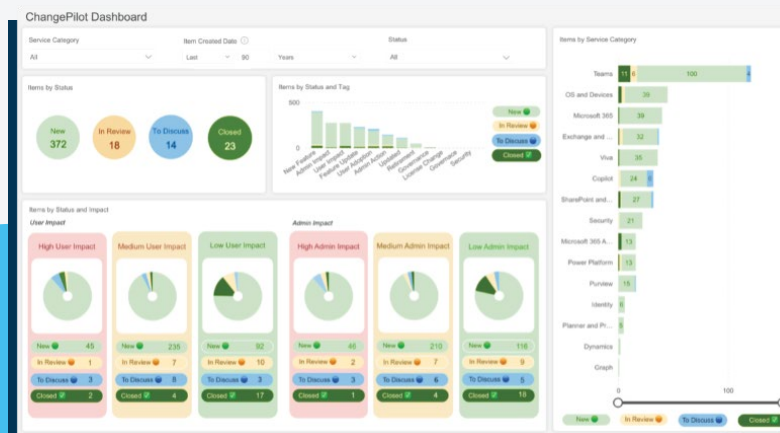

ChangePilot enables organizations to easily track and manage updates from the Microsoft 365 Message Center and Roadmap. Using AI and expert insights, it delivers clear, actionable information to reduce risks, save time and maximize your investment in Microsoft 365.

How it works

- **Collect and Filter:** Automatically gathers new and updated items from the Microsoft 365 Message Center and Roadmap.
- **AI and Expert Analysis:** Uses AI and human intelligence to summarize changes into key points and assign impact ratings.
- **Automated Workflow:** Delivers tenant-specific updates to dedicated Teams channels and SharePoint Lists, enabling proactive collaboration across your teams.
- **Interactive Dashboards and Reporting:** Power BI reports to view change health at a glance.
- **Monthly Communication:** Sends detailed reports and hosts calls

Who's it for?

- **Businesses** overwhelmed by Microsoft 365 updates
- **IT teams** focused on governance and compliance
- **Organizations** looking to minimize risks from cloud changes
- **Teams** needing to prioritize high-impact updates
- **Decision-makers** seeking clear, actionable insights

➤ **ChangePilot Pro output**
