

Cyber Posture Review

FACT SHEET

Confidence in compliance. Strength in resilience.

With new and evolving regulations like NIS2 and DORA, it's more important than ever to have a clear, confident approach to cyber risk and governance. Our cyber posture review helps you identify any strengths and gaps, and maps out the next steps to meet your obligations and build lasting resilience.

Overview

We provide a structured, independent assessment of your organisation's cyber maturity, operational resilience, and regulatory readiness. Whether your priorities are internal assurance, regulatory compliance, or board-level reporting, we map findings to the framework that best suits your context, including CIS Controls v8, DORA, NIS2, or NCSC Cyber Assessment Framework (CAF).

Designed for essential service providers, financial institutions, and regulated organisations, this review offers practical insights and a prioritised roadmap for meaningful improvement.

What the review includes:

- Framework mapping – findings aligned to the framework(s) most relevant to your organisation
- Governance & accountability – evaluation of leadership, roles, policies, and board-level engagement.
- Technical & organisational controls – assessment of identity, access, data protection, vulnerability management, incident response, and more.
- Operational resilience – insight into detection, response, recovery, and business continuity capabilities.
- Third-party risk – review of controls for ICT providers, MSPs, and critical suppliers.
- Cultural maturity – understanding of user awareness, behaviour, and security culture.
- Gap analysis & roadmap – clear recommendations prioritised by business risk and regulatory impact.

How it works

- ✓ Discovery session – to clarify scope, sector, and regulatory context.
- ✓ Structured evidence gathering – through interviews, document reviews, and optional technical checks.
- ✓ Tailored report – risk-prioritised recommendations mapped to the chosen framework(s), ready for audit, board review, or programme planning.
