

FACT SHEET

Local Area Network (LAN) Management

Maximise your investment for greater productivity returns

As the “plumbing” of every environment, wired and wireless campus networks are often overlooked. However, ensuring they are reliable, efficient, and scalable is critical in providing a good experience for your IT users. In addition, the perimeter firewall is often the first line of defence for businesses and is critical in building a secure environment.

Overview

As multi-disciplined experts in complex networking technologies, Wavenet Corporate Services boasts a range of vendor accreditations.

Our breadth and depth mean we can deliver flexible management options for campus, branch, and data centre networking, including firewalls and intrusion prevention systems (IPS).

What does LAN Management deliver?

Wavenet provides a choice of support and management packages to fulfil a wide range of service level and budget requirements, whether it's a completely new environment or an adoption of an existing network. With three service options to choose from, we can deliver remote technical and security advice, event monitoring and full management, including changes, security patching and regular health checks.

Advised (Essentials)

Designed for customers who want to manage their own environment yet have access to skilled technical resource for ad-hoc assistance where required.

Monitored (Enterprise)

Designed for customers wishing to co-manage their environment with Wavenet, adding monitoring and event management.

Managed (Enterprise Plus)

Designed for customers requiring a fully managed service, safe in the knowledge that their environment is being monitored and managed by Wavenet's experienced engineers. Includes incident and problem handling, plus change and patch implementation.

Wavenet Service Model	Advised	Monitored	Managed
Remote Technical Advice	✓	✓	N/A
Operational Event Monitoring	✗	✓	✓
Incident Resolution	✗	✗	✓
Change Implementation	✗	✗	✓
Security Device Patching	✗	✗	✓
Evergreen Patching	✗	✗	Optional

Technology

Wavenet offers the following solutions from a range of vendors, including platforms developed by us:

- Campus switching
- Network access control (NAC)
- Campus Wi-Fi
- Wi-Fi analytics and security
- Routing and SD-WAN
- Data centre switching
- Firewalls
- Load balancers
- Management platforms
- Security cameras

Why Wavenet?

- **The best technology** – highest levels of accreditation with the world's leading vendors, including Cisco (Gold Partner), Cisco Meraki (Gold Partner), Extreme (Diamond Partner) and Fortinet (Expert Partner)
- **Expert assistance** – support from hundreds of skilled engineers throughout the UK to provide ongoing support 365 days a year
- **Enhanced efficiency** – by choosing a managed service level that suits your business, experience streamlined efficiencies and reduced cost

Have you thought about...?

Connectivity Solutions

We can help you securely and reliably connect your users and devices to the applications and data they need to keep your organisation running and your customers happy.

Cyber Security Solutions

We can help you to improve your security posture and better protect your network.
