Claria

SOLACE CLOUD PRICING

Flexible Pricing Options

Solace Cloud offers a managed event streaming and messaging platform (SaaS) with pricing based on broker capacity, service levels (HA), and contract duration. It provides tiered,, scalable Enterprise Event Broker services with options for pay-as-you-go or annual commitments. Final, tailored pricing is generally determined through consultation with Claria to match specific workload requirements.

Key Pricing Tiers and Features

- Capacity Tiers: Services are tiered by concurrent connections, queues, message throughput (Mbps), and storage
- High Availability (HA): Cloud-managed event brokers are HA by default, with some standalone options available.
- Performance Scaling: Storage is configurable up to 6TB, and tiers support increased message throughput as the tier increases.

Key Pricing Components

- Event Brokers: The core messaging service.
- Application Services/Add-Ons: Additional functionality.
- Success Services: Includes training, support, and monitoring.
- Deployment Options: Available on AWS, Azure, and Google Cloud, with options for public or private virtual networks.

Other Options

- Standard Edition (Software): A free, full-featured version is available for self-managed environments.
- Enterprise Edition (Software): Includes support and higher performance for self-managed setups.
