WSO2 DEVANT PRICING

Flexible Pricing Options

Devant by WSO2 is an AI-native Integration Platform as a Service (AI iPaaS) that uses a consumption-based pricing model designed to offer value for money by not charging for specific integration features. Devant's pricing is structured to support modern, AI-driven integration, providing flexibility for organizations looking to integrate AI models, knowledge bases, and traditional systems. Claria UK Ltd can provide a tailored quote based on your specific requirements.

Pricing Structure Highlights

- Usage-Based Model: Costs are typically calculated based on the volume of work, such as the number of APIs, integrations, transactions, or user metrics.
- Key Tiers/Structure:
    - Starter Tier: Includes 5 integrations, 1M transactions/month (for 3 months), 100 automation minutes, and limited API versions/developers.
    - Enterprise: Custom pricing for higher, unlimited, or specialized needs.
- Core Benefits: Connectors, templates, and AI agents are available, allowing for scaling without increasing license costs for those features.
- Exceptions: Some nodes (e.g., passive, disaster recovery) may not be counted in the subscription cost.
