

Title BCN Pathfinder

Service Description BCN Pathfinder delivers AI-powered cloud support, guiding organizations from discovery to measurable value. Through structured workshops, rapid pilots, and scalable rollouts, Pathfinder ensures secure, evidence-based transformation. The service provides actionable roadmaps, proof-of-value pilots, and continuous improvement, reducing risk and accelerating adoption for sustainable business outcomes.

Service Features

- AI-led discovery workshop identifies opportunities, aligns objectives, and assesses readiness.
- Prioritised backlog links business challenges to measurable outcomes and value.
- 12-month roadmap details sequencing, dependencies, and clear success criteria.
- Proof-of-value pilot delivers rapid implementation, validating impact and lessons learned.
- Controls-first delivery embeds security, governance, and transparent risk management upfront.

Service Benefits

- Clarity and confidence with evidence-backed, board-ready AI adoption roadmap.
- Reduced risk through evidence-gated progress and safe, scalable transformation.
- Measurable outcomes: tangible artefacts, pilots, and actionable scaling plans delivered.
- Accelerated value: rapid discovery and implementation cycles minimize uncertainty.
- Expert-led delivery combines AI innovation with cross-specialist human expertise.
