

Service Definition *Implementation*

About Olive Jar

Who We Are

Olive Jar Services include a range of activities that ensure successful implementation of your cloud service. We design and deliver cloud based services from Discovery to Live. We provide full agile multi-disciplinary teams who are ready to commence work on your service immediately.

Our teams are agile skilled resources who have specialist knowledge in their fields of expertise. This includes areas such as User Research, Design, Test, Implementation, Development, QA, Data Migration, Architecture, Security, Scalability and Maintainability of Cloud services.

We work with your internal teams, building the service to achieve the goals set. We can coach internal teams and mentor your team as needed, to help them upskill rapidly.

Implementation

Our consultants deliver the design, deployment and implementation of cloud based solutions, including the programme management, architecture, analysis, configuration, integration and testing. Our consultants approach tailors our service, to meet organisational end goals for website, application and content management system implementations to the cloud. We've delivered a range of services, supporting organisations from the initial discussion on Cloud needs, through strategic design for transition. We plan migrations and create roadmaps to design architecture, minimising associated risks involved and enabling smooth transition to cloud environments. Our consultants are suitable to deliver across all Health, Social Care, Local and Central Government, Education, Fire and Rescue and Police cloud technology settings.

Our consultants have also advised, assisted and owned complete delivery of Microsoft Dynamics Online and Office 365, including Listening and Engagement Tools. We've created bespoke customisations, and also configured out-of-the-box features. We utilise the Microsoft Azure platform where appropriate to support Dynamics CRM implementations.

Features

- Expert Guidance ensuring value added during cloud implementation
- Analysis of 'as is' and 'to be' processes and systems
- Adherence to continuous delivery principles
- Agile methods utilised, aiding modern software building and deployment
- Application implementation tailored to your business needs
- Compliance with GDS security framework
- Guidance in simplifying maintenance and support for lasting change
- Performance analysis and data management
- Expert support throughout entire transformation lifecycle
- Service transition management and support

Benefits

- Using our knowledge from many other Government projects
- Implementing new tools and technologies reducing costs and time
- Leading projects, ensuring delivery and risks known and mitigated
- Reduced costs across digital services and agile teams
- Increased successes in shorter time frames from your Agile teams
- Investments converted to open, accessible cloud-based applications
- Improved processes allowing for superior scaled delivery
- Facilitate seamless flow of information through shared services
- All implementation in adherence to GDS standards

Services offered but not limited to:

- Agile Coaching and Mentorship
- Product Ownership
- Service Ownership
- Delivery Management
- User Research
- User Experience
- Content & Service Design
- Prototyping and Implementation
- Migration
- Full Stack Development
- Auditing
- AI & Machine Learning
- Support

Features

- Research, Architecture and Design
- Building the service to be maintainable, scalable and secure
- Supporting the service once live
- Aligning to GDS Service Standards when necessary

Benefits

- Continuous improvement
- Continuous deployment
- Reduction of errors and live costs
- Security
