

Service Definition *Audit*

About Olive Jar

Who We Are

Olive Jar Services include a range of activities that ensure successful implementation of your cloud service. We design and deliver cloud based services from Discovery to Live. We provide full agile multi-disciplinary teams who are ready to commence work on your service immediately.

Our teams are agile skilled resources who have specialist knowledge in their fields of expertise. This includes areas such as User Research, Design, Test, Implementation, Development, QA, Data Migration, Architecture, Security, Scalability and Maintainability of Cloud services.

We work with your internal teams, building the service to achieve the goals set. We can coach internal teams and mentor your team as needed, to help them upskill rapidly.

Audit

Our consultants deliver tailored and flexible audits on IT strategy, infrastructure, data, implementation, capability and security services to comply with all current government legislation, which also enables organisational benchmarking.

Our audit service allows review, assurance and audit of all IT and digital service infrastructure estates and not limited to any technology. This includes GDPR readiness assessment, infrastructure audit, health checks, vulnerability identification, mitigation, producing prioritised recommendations, ensuring data protection and security is not an afterthought.

Our service will empower your organisation to gain greater insight and assurance into how IT services and third party suppliers are performing against their contractual commitments.

Features
