

Azure Cloud Migrate & Modernise Readiness Assessment

Access your organisation's readiness for Azure modernisation, and create a high-level strategy and migration roadmap.

Many organisations want to move their applications and infrastructure to the cloud, but the lack of a clear cloud migration strategy, design, and plan often hold them back.

Typical challenges include:

- Internal knowhow to improve innovation, agility, and performance with cloud.
- Determining TCO and ROI for your cloud investments.
- Understanding your IT environment and its interdependencies.
- Knowing which of your apps are cloud-ready, and the order in which to migrate.

Kocho's Microsoft Funded Azure Migration and Modernisation Readiness Assessment provides a clear view of your current environment, identifies best migration strategies, and helps build a clear business case for moving to the cloud - along with a high-level migration plan.

This helps you minimise migration risks and make better-informed decisions.

Key outcomes:

Leverage industry-leading resources: Tap into our experts, market-leading tooling, and rigorous cloud migration frameworks to ensure migration success.

Understand costs and risks: Build the business case for cloud modernisation with The Board, and clearly understand ROI.

Optimise your environment: Uncover security, cost, and efficiency improvements to be gained by cloud modernisation.

High-level cloud modernisation plan: Receive a high-level plan, including: migration roadmap, priorities, costs and savings estimates, and timelines. All aligned to your business goals.

AI Readiness: Bring your apps and data securely into the cloud as a first step to realising the full benefits of AI and data intelligence.

Our approach:

Kick-off workshop: Kocho will evaluate your overall business objectives, desired outcomes, current pains, and in-house capabilities, and align recommendations accordingly.

Infrastructure discovery: Using Microsoft and Kocho tools, we'll assess and map your current environment and provide complete visibility into your apps and infrastructure, their performance, and their dependencies.

Migration mapping: Kocho consultants will work with your team to map your existing infrastructure to application stacks and analyse best approaches for rationalisation using the 6R's approach.

TCO analysis: Kocho will assess current spend and consumption and conduct a cost-modelling exercise to help estimate your future cloud consumption. Cost modelling will include, but not limited to, Microsoft Azure hybrid benefits and possible Microsoft incentives.

High-level report: Kocho will create a high-level migration plan and report containing proposed roadmap, priorities, costs and approach. We'll also provide guidance on risks, and contingencies based on your business objectives and goals.

Engagement stakeholders:

- CIO / CTO
- IT Directors or Managers
- Cloud Solution Architects
- Application Architects
- Compliance Managers

Engagement Duration:

Our Cloud Readiness Engagement Typically lasts 2-4 weeks.

Week 1:

Kick-off workshop and interviews.

Weeks 2-3:

Analysis, assessments, infrastructure mapping and migration planning.

Week 4:

High-level report and playback, and agreeing next steps.
