

Endpoint Management Workshop

Enable users to be productive, on any device, without compromising IT security

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

Today's users are looking for more ways to remain productive while working on any device. 95% of organisations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage both company-owned and user-chosen devices in the cloud.

Workshop highlights

- Improve your Secure Score with Microsoft Endpoint Manager.
- Learn how to build management policies that protect your users, company data, and devices.
- Gain insights about your users' endpoints and their compliance with your IT policies.
- Determine the best way to give your users access to the apps they need on the devices of their choosing.

The Endpoint Management workshop

This 3 day workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

- **Learn** how to improve your management capabilities with Microsoft Endpoint Manager.
- **Discover & Protect** your endpoints by enforcing policies and deploying security tools.
- **Secure** your users' identities with multi-factor authentication & conditional access from any device.
- **Enable** your users to be productive with the applications they need, on the devices they want.

What to expect

Get an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organisation. Our goal is to show you the best ways to manage endpoints at the enterprise level.

We'll provide you with the ability to protect your authorised users' identities so you can authenticate credentials and manage access, while still giving users the freedom to collaborate with others.

Key deliverables

We can customise the workshop based on your organisation's needs, including:

- Engagement set up
- Microsoft Endpoint Manager
- Baseline security
- Device config. and management
- Design and planning
- Customer value conversation
- Discovery session for endpoints
- Key results, recommendations and next steps

Who should attend

The workshop is intended for security decision-makers such as:

- C-level executives (CISO, CIO, CSO)
- Endpoint & Device Management owners
- IT Security and IT Operations

Next steps

Contact us to find out more about our Endpoint Management Workshop. Our friendly team of experts will be happy to help.
