

Azure Optimisation Manager

Identify and remove wasted spend on unnecessary or under-utilised cloud resources

Is your cloud spend out of control?

Your organisation is navigating constant and unpredictable change. And that includes your workforce, the resources staff are consuming, and licensing costs.

It can be easy to lose sight of what's happening. And without proper visibility and management of your Azure environment you risk wasted spend and inefficiencies creeping in.

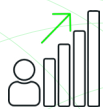

Kocho's Azure Optimisation Manager delivers the visibility and intelligence you need to prevent nasty cloud consumption bill surprises – and save thousands!

Your Challenges:

Spiralling costs

Over-provisioned accounts and uncontrolled resource consumption can lead to sharply rising cloud consumption charges..

Budget Shocks

Inadequate cost monitoring and analysis, could mean you are paying for licensing you don't need.

Missed opportunities

Complex cloud contracts, and a lack of focused resources could mean you are failing to capitalise on significant Microsoft incentives and benefits.

Security gaps

Elevated privileges and unused or dormant licenses are creating vulnerabilities.

Azure Optimisation Manager can help you:

1 Optimise Cloud Spend

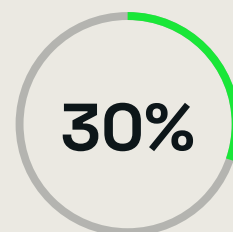

Quickly identify cost saving opportunities from across Azure – including virtual machines, zombie resources, and untapped Microsoft benefits – to rapidly recoup money for reinvestment.

2 Adopt a FinOps mentality

Introduce increased visibility and agile reporting, and demystify spend allocation and resource usage. Pave the way for efficient decision making and better forecast future spending.

3 Improve governance

Receive in-depth security insights and governance recommendations, while using smart tagging to identify and classify consistent infrastructure standards.

Reduce cloud spend by up to 30%

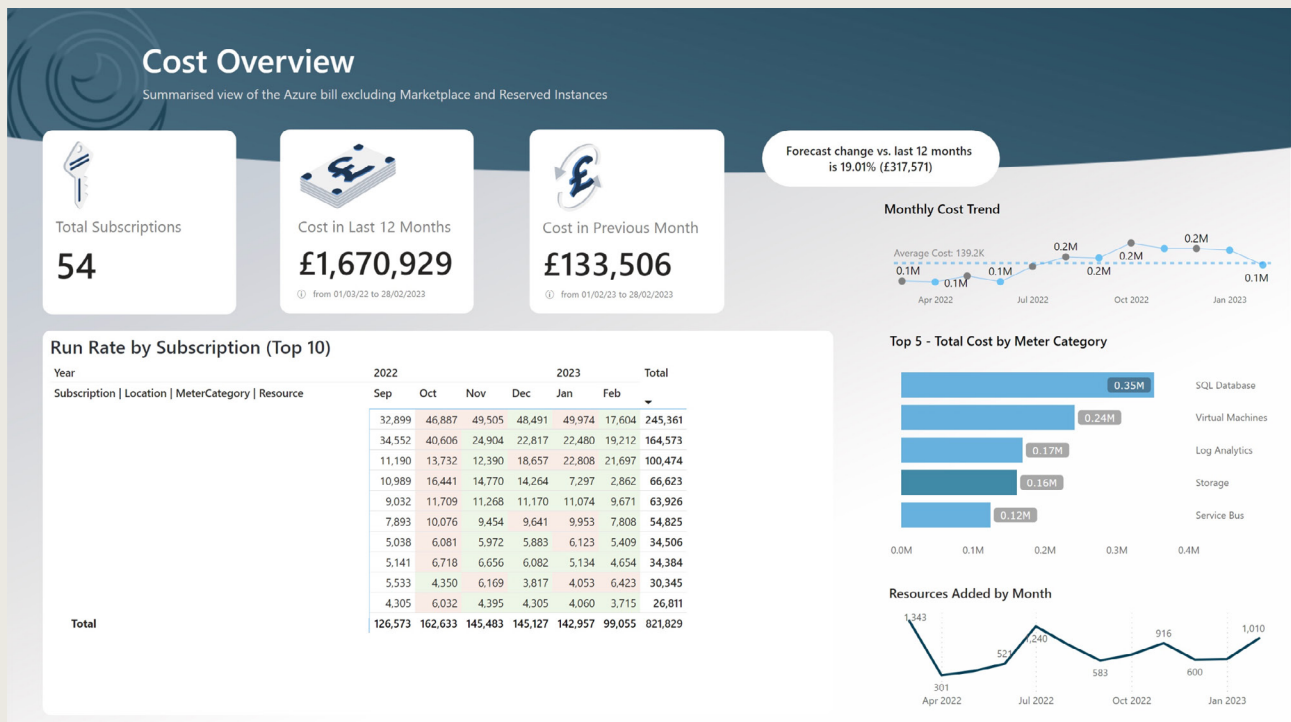

A Scientific Instrument Manufacturer was able to identify Azure savings of **\$50,000** within just **4-weeks**.

Get started with an Azure Health Check

Our Azure Health Check uses powerful AI-driven technology to deliver you a custom dashboard for your Azure environment, surfacing opportunities to optimise costs, resources, and cloud functionality.

As part of the Health Check, you'll receive both a summary and deep-reaching insight report to help maximise the ROI of your cloud transformation journey and Azure usage.

The report will surface cost, usage, wastage, and optimisation opportunities across highly relevant areas of Azure – including VM and storage optimisation, Kubernetes, hybrid benefits, and Azure tagging.

Your Health Check Benefits :

Set-up in minutes

Onboarding is fully automated with no technical requirements on your part.

Read-only access

Your data is secure. No provisioning or agents deployed. No data ingested.

Cloud optimisation

Better understand usage and expenditure to regain control over cloud resources and their costs.

Understand cloud resource usage

Understanding which resources are being used, and gauge whether there's any unnecessary or under-utilised resources to expand into or remove.

Invest smarter

Discover untapped Microsoft incentives and accurately forecast future spend. Take advantage of reallocation opportunities.

Security & compliance

Locate and resolve elevated roles, inactive identities, and disabled security features.

About Kocho

At Kocho, we believe greatness lies in everyone.

That's why we exist, to help companies realise their potential.

By combining the power of Microsoft cloud technology with identity, mobility, connectivity and cyber security services, and our team of talented people, we take our clients on a journey of secure cloud transformation.

And we're with you every step of the way. Because the path to greatness isn't walked alone. We help you adopt and embrace the right tech solutions at the right time.

The result? Sustainable and secure growth that amplifies your business success.

Kocho. Become greater.
