

SERVICE DESCRIPTION

Data Privacy and GDPR Services

Comprehensive GDPR support covering readiness assessments, DPIAs, policy development, RoPA creation, processor reviews, and privacy-by-design implementation. These services help organisations maintain lawful, transparent, and secure personal-data processing while meeting regulatory expectations and strengthening overall privacy governance.

GDPR Maturity Assessment

Evaluates current privacy controls, governance structures, and compliance posture against GDPR requirements.

DPIA Support

Guides completion of Data Protection Impact Assessments to identify and mitigate high-risk processing.

RoPA Creation

Develops Records of Processing Activities that provide clear documentation for regulators and audits.

Privacy Notice Development

Ensures transparency by creating clear, compliant, and user-friendly privacy notices.

Data-Flow Mapping

Documents how personal data moves across systems and suppliers to identify risks and control gaps.

Third-Party Reviews

Assesses processors and partners to ensure contractual, technical, and organisational safeguards are in place.

BENEFITS

✓ Reduced Regulatory Risk

Strengthens compliance posture and reduces the likelihood of fines or enforcement action.

✓ Increased Data Governance

Enhances oversight of personal-data processing across systems and suppliers.

✓ Clear Processing Controls

Provides documented, repeatable processes that meet GDPR expectations.

✓ Improved Vendor Compliance

Ensures processors meet required contractual and technical standards.

✓ Ongoing Compliance Assurance

Supports sustainable privacy programme maturity and reduces long-term risk.

✓ Enhanced Customer Trust

Demonstrates responsible handling of personal data, improving reputation and confidence.
