

SERVICE DESCRIPTION

Cyber Essentials Plus

CSA Cyber's Cyber Essentials Plus (CE+) service provides independent, hands-on technical security auditing and testing to validate compliance with the UK Cyber Essentials controls. The assessment confirms system hardening, patching, malware defences, configuration security, and user access controls, ensuring the organisation meets mandatory cybersecurity standards and can meet CE certification requirements.

External Vulnerability Testing

Identifies exposed weaknesses across internet-facing assets in line with CE+ requirements.

Vulnerability Management

Validates patching, hardening, and internal system security status in line with CE requirements.

Malware Protection

Assesses effectiveness of endpoint protection and detection controls.

Email Security

Assesses filtering, spoofing resistance, and malicious payload handling.

Access Control

Checks the strength and appropriateness of user access and permissions.

Web-Based Attack Simulation

Evaluates resilience against common browser-based threats.

Formal CE+ Audit

Full independent assessment by a certified CE+ auditor.

BENEFITS

✓ Government-Recognised Assurance

Official validation aligned to UK-mandated security standards.

✓ Reduced Breach Risk

Eliminates common attack paths exploited by threat actors.

✓ Stronger Technical Defences

Ensures robust configuration, patching, and malware protections.

✓ Enhanced Customer Trust

Demonstrates verified commitment to cybersecurity.

✓ Supports Compliance Requirements

Helps satisfy regulatory, tender, and supply-chain obligations.

✓ Validates Secure Configuration

Confirms systems are hardened and aligned with CE+ expectations.

✓ Supports Tendering Processes

CE+ is often required for public-sector and defence-related contracts.
