

SERVICE DESCRIPTION

PCI DSS QSA Services

Our PCI-DSS services deliver end-to-end PCI DSS assessments, evidence reviews, control validation, and compliance reporting. This service supports organisations in achieving and maintaining PCI DSS compliance through structured assessments, expert guidance, and practical remediation planning to strengthen cardholder-data security.

PCI Scope Validation

Ensures accurate scoping of cardholder-data environments to prevent unnecessary exposure and reduce audit burden.

Gap Analysis

Identifies control weaknesses, missing processes, and non-compliant areas ahead of formal assessment.

Evidence Review

Validates documentation, logs, configurations, and records required to demonstrate PCI DSS compliance.

Full ROC/SAQ Assessment

CSA conducts formal - Report on Compliance (ROC) or Self-Assessment Questionnaire (SAQ) reviews in line with PCI DSS requirements.

Control Verification

Tests the effectiveness of required security controls, including network segmentation, access management, logging, and encryption.

QSA Advisory Service

Provides expert interpretation of PCI DSS requirements and pragmatic guidance for achieving compliance.

BENEFITS

✓ Improved Cardholder Data Security

Strengthens protection across storage, processing, and transmission of payment data.

✓ Independent Expert Validation

Provides objective, QSA-certified assurance of security and compliance posture.

✓ Greater Customer Confidence

Demonstrates strong payment-security practices, improving trust and reputation.

✓ Clear Compliance Roadmap

Provides direction from initial assessment through to certification and ongoing maintenance.

✓ Strong Evidence Management

Ensures documentation and artefacts are clean, structured, and audit-ready.
