

SERVICE DESCRIPTION

Penetration Testing as a Service (PTaaS)

CSA Cyber's Penetration Testing-as-a-Service (PTaaS) provides a modern, flexible, credit-based approach to security assurance. Instead of procuring individual engagements, customers purchase an annual allocation of credits that can be called down against any offensive security services throughout the year. This simplifies procurement cycles, accelerates scheduling, and ensures organisations maintain continuous security assurance.

Our PTaaS subscription combines deep technical expertise, accredited consultants, and a powerful security platform to deliver year-round visibility, remediation support, and strategic guidance. In brief:

- ✓ Credit-based subscription – A simple, predictable model where credits act as a call-down bank for any testing service.
- ✓ Flexible consumption – Use credits for application, infrastructure, cloud, red teaming, social engineering as needed.
- ✓ Continuous assurance – Always-on visibility of vulnerabilities, continuous collaboration, and access to CSA experts.
- ✓ Platform-driven delivery – Real-time dashboards, findings, remediation workflows, and Jira integration.
- ✓ Accredited teams – CHECK, CREST and other specialists delivering consistently high-quality engagements.

BENEFITS

- Gain instant clarity with real-time vulnerability insights delivered through our powerful security platform.
- Accelerate assurance with accredited experts and fast-track SLAs designed to keep your programme moving.
- Stay connected with seamless collaboration via dedicated Teams or Slack channels for every engagement.
- Integrate effortlessly into your workflows with optional Jira syncing for streamlined remediation.
- Keep momentum high with flexible cancellation terms and included retesting for critical, high-impact issues.
- Experience smooth delivery backed by our Customer Success team, with enhanced support and strategic guidance at the Enterprise tier.
- Unlock added value through Enterprise benefits such as credit rollover, additional onboarding, and exclusive service discounts.
