

SERVICE DESCRIPTION

Cyber Security Virtual Teams

On-demand access to senior cyber specialists who provide leadership, governance, compliance oversight, and hands-on operational support. These virtual roles strengthen strategy, uplift security maturity, and enhance regulatory readiness without requiring permanent headcount, offering flexible and scalable security expertise.

Strategic Security Leadership

CSA Cyber provides high-level direction, security strategy development, and executive-level guidance.

Risk Management Support

Help clients identify, prioritise, and manage organisational cyber risks effectively.

Governance Framework Development

Build policies, structures, and governance models aligned to best-practice standards.

Compliance Oversight

Support ongoing alignment with ISO 27001, GDPR, NIST, Cyber Essentials, and industry regulations.

Policy & Process Maturity

Improve the quality, consistency, and adoption of security policies and operational procedures.

Incident Response Guidance

Offer expert input during incidents and helps mature IR playbooks and readiness.

Threat Monitoring Input

Advice on threat intelligence, monitoring improvements, and detection enhancements.

BENEFITS

✓ Access to Senior Experts

Specialist leadership without the cost and recruitment overhead of full-time roles.

✓ Lower Leadership Cost

A cost-efficient alternative to in-house CISO, ISM, or DPO positions.

✓ Stronger Governance

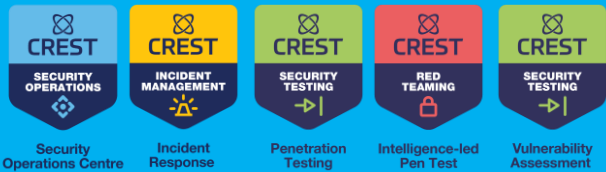

Improves oversight, structure, and decision-making across the security programme.

✓ Reduced Compliance Risk

Ensures ongoing readiness for audits, certifications, and regulatory obligations.

✓ Increased Stakeholder Assurance

Builds confidence with customers, partners, and regulators.
