

SERVICE DESCRIPTION

Cyber Security Assessment

CSA Cyber’s Security Assessment delivers a structured, end-to-end evaluation of an organisation’s security maturity using the NIST Cyber Security Framework (CSF). The assessment examines governance, controls, processes, and technology to identify weaknesses, prioritise risks, and provide a clear roadmap for strengthening resilience and aligning with best-practice security expectations.

NIST CSF Governance Review

Evaluates policies, roles, and oversight to expose governance gaps and strengthen strategic security alignment.

Security Controls & Processes

Assesses operational controls and processes to measure maturity, consistency, and resilience.

Technology & Architecture Evaluation

Reviews configurations and architecture to identify weaknesses, misconfigurations, and missing defence-in-depth.

Risk Prioritisation & Maturity Scoring

Maps findings to NIST CSF maturity levels with clear, risk-driven prioritisation.

Security Improvement Roadmap

Delivers a targeted, actionable uplift plan with sequenced initiatives and measurable outcomes.

BENEFITS

Comprehensive Maturity Insight

Clear visibility of strengths and gaps across governance, processes, and technology.

Aligned to NIST Best Practice

Assessment structured around a recognised, industry-standard framework.

Actionable Improvement Roadmap

Prioritised guidance that supports strategic uplift and investment decisions.

Risk-Driven Decision Support

Findings ranked by impact and likelihood to enable informed choices.

Independent Expert Analysis

Senior consultants provide objective, evidence-based recommendations.
