

SERVICE DESCRIPTION

ISO 27001 Consultancy Services

Comprehensive support in designing, implementing, and enhancing an ISO 27001-aligned Information Security Management System (ISMS).

This includes gap analysis, risk assessment, policy development, control implementation, documentation creation, and full audit-readiness preparation to help organisations achieve certification to ISO 27001:2022.

ISO Gap Assessment

Identifies gaps between current practices and ISO 27001:2022 requirements.

Policy Development

Builds essential governance, security, and operational policies.

ISMS Design

Creates a structured, scalable Information Security Management System.

Risk Assessment Support

Guides risk identification, scoring, and treatment planning.

Audit Preparation

Prepares teams, evidence, and processes for external certification audits.

Governance Support

Enhances security ownership, reporting, and accountability models.

Continuous Improvement Guidance

Supports maturity uplift and ongoing ISMS optimisation.

BENEFITS

Enhanced Security Oversight

Establishes a clear framework and responsibility for security management.

Better Risk Management

Improves processes for identifying, evaluating, and addressing risks.

Faster Certification Preparation

Facilitates quicker achievement of ISO 27001:2022 certification.

Lowered Risk of Breaches

Increases awareness and implementation of controls to reduce security incidents.

Increased Stakeholder Confidence

Showcases a mature and independently verifiable security posture.

Stronger Organisational Resilience

Boosts capabilities to prevent, detect, and respond to incidents effectively.
