CSACyber | G-Cloud

SERVICE DESCRIPTION

Cloud Security Assessment

A detailed security review of cloud environments including Microsoft 365, Azure, AWS or GCP, including hybrid cloud. CSA Cyber identify misconfigurations, insecure default configurations, weak identity controls and policy weaknesses, delivering actionable remediation aligned to Microsoft best practice, NIST CSF, and zero-trust principles.

Cloud Configuration Review
Evaluates Microsoft 365, Azure, AWS, GCP, and hybrid-cloud configurations to detect insecure defaults and architectural weaknesses.

Identity & Access Assurance
Assesses Entra ID policies, roles, MFA, conditional access, and privilege models to expose poor identity access management.

Security Controls & Policy Validation
Reviews security baselines, monitoring settings, logging, data protection, and compliance configurations.

Misconfiguration & Gap Analysis
Identifies misconfigurations, unmanaged assets, weak controls, and deviations from Microsoft-recommended best practice.

Zero-Trust Alignment Review
Measures adoption of Zero-Trust principles across identity, device, network, applications, and data layers.

Actionable Remediation Guidance
Delivers prioritised, practical fixes aligned to Microsoft best practice, NIST CSF, and real-world threat models.

BENEFITS

✓ **Strengthened Cloud Security Posture**
Clear visibility of weaknesses and step-by-step actions to uplift overall cloud resilience.

✓ **Alignment to Industry Best Practice**
Assessment built on Microsoft recommendations, NIST CSF, and Zero-Trust fundamentals.

✓ **Reduced Risk of Breach & Misuse**
Exposes configuration flaws that attackers typically exploit across Microsoft cloud environments.

✓ **Improved Identity & Access Security**
Ensures strong controls around authentication, authorisation, and privileged access.

✓ **Optimised Compliance Readiness**
Enhances auditability and supports readiness for frameworks like ISO 27001, SOC 2, and Cyber Essentials.

✓ **Expert, Independent Insight**
Delivered by cloud security specialists providing objective analysis and pragmatic remediation advice.

CREST Security Operations – Security Operations Centre
CREST Incident Management – Incident Response
CREST Security Testing – Penetration Testing
CREST Red Teaming – Intelligence-led Pen Test
CREST Security Testing – Vulnerability Assessment

Assured Service Provider – in association with National Cyber Security Centre – CHECK Penetration Testing

Assured Service Provider – in association with National Cyber Security Centre – Cyber Incident Response: Standard Level
