SERVICE DESCRIPTION

Incident Response Tabletop

Simulated attack exercises that test organisational readiness across response, communication, decision-making, and recovery. These sessions validate Incident Response (IR) plans, expose operational and procedural weaknesses, and strengthen preparedness for real-world cyber incidents.

Bespoke Scenario Design
Scenarios tailored to your environment, threat profile, and business operations to ensure realism and relevance.

Facilitated Walkthroughs
Expert-led sessions guide teams through attack timelines, helping them understand expected actions and decision points.

IR Plan Validation
Tests whether current response plans are practical, complete, and aligned with real-world incident conditions.

Cross-Team Coordination Testing
Evaluates how security, IT, legal, communications, and leadership collaborate under pressure.

Crisis Communication Drills
Assesses internal and external communication processes, including stakeholder, user, and media messaging.

Regulatory Reporting Scenarios
Exercises obligations under frameworks like GDPR, NIS2, and sector-specific mandates.

Leadership Exercises
Engages senior management in decision-making, risk balancing, and escalation routes during high-impact incidents.

Findings & Recommendations
Clear, actionable outputs identifying capability gaps, improvement priorities, and resilience enhancements.

Severity-Based Improvement Planning
Provides prioritised actions mapped to incident severity levels to guide practical maturity uplift.

BENEFITS

✓ **Improve Incident Readiness**

Teams understand their roles and responsibilities, increasing confidence and response speed.

✓ **Effective Team Coordination**

Exercises strengthen collaboration and reduce confusion during real cyber events.

✓ **Validated Response Plans**

Ensures your IR plans are realistic, actionable, and aligned with current threats.

✓ **Reduced Regulatory Risk**

Improved preparedness supports faster, more accurate regulatory notifications.

✓ **Improved Crisis Communication**

Teams learn to communicate clearly, consistently, and in a controlled manner during incidents.

✓ **Increased Situational Awareness**

Helps teams recognise indicators, attack patterns, and escalation triggers early.

✓ **Reduced Incident Impact**

Faster, more efficient responses lower operational, financial, and reputational damage.
