Client access licences are based on the number of registered/named users. User concurrency cannot exceed the number of registered users.

Prevent + Protect Implementation Services

The exact volume of services required is dependent upon the modules and product options selected, implementation assistance needed, data migration and other assistance.

Description	Cost Per Day (£)
Prevent + Protect Implementation Services	1,100

Service days are invoiced on order and credited to a call off account. A weekly or monthly statement of time used is issued to the client for the duration of the project. The project time must be used within 18 months from order date, at which point the balance will be cleared.

All prices exclude VAT. All work would take place remotely. Where work takes place on-site or at the premises of a third party, travel time plus reasonable travel and subsistence expenses will be charged at cost.
