Service Description

Kerv are an ISO Certified, Microsoft Cloud Solutions partner with all 6 designations and demonstrable experience delivering digital transformation programmes in multiple sectors. Kerv Digital partner with organisations to create a programme of incremental change which truly transforms the experience of your citizens and staff, implementing digital solutions to address your business challenges.

Our service assesses organisational readiness for cloud migration and provides a structured plan for moving workloads to Azure or between cloud platforms. We evaluate current infrastructure, applications, data, security, governance and operational capability, producing a clear roadmap that supports a smooth, secure and efficient transition to cloud or multi-cloud environments.

Features

- Assess existing infrastructure to identify cloud migration prerequisites and dependencies.
- Analyse applications to determine migration approach, compatibility and transformation needs.
- Review data estates to validate suitability for cloud migration strategies.
- Evaluate security posture against cloud aligned governance and compliance requirements.
- Map operational processes to define cloud ready support capabilities.
- Assess networking and identity configurations for cross cloud connectivity readiness.
- Review organisational skills and capacity for cloud adoption activities.
- Identify risks, issues and blockers affecting migration feasibility and timelines.
- Produce a cloud migration roadmap with prioritised actions and recommendations.
- Provide guidance on tooling, architecture and patterns for migration planning.

Benefits

- Reduce risk by identifying migration challenges before project initiation begins.
- Improve decision making with clear evidence supporting cloud migration choices.
- Accelerate migration through structured planning and prioritised readiness tasks.
- Strengthen security by aligning governance to cloud best practices.
- Optimise cost by selecting appropriate migration strategies for workloads.
- Increase stakeholder confidence with transparent analysis and clear recommendations.
- Build internal capability with guidance on cloud skills and requirements.
- Support hybrid and multi cloud strategies through comprehensive readiness evaluation.
- Reduce rework by validating architecture and dependencies early in planning.
- Ensure successful migration outcomes through detailed roadmap and action plans.

How We Plan Our Service:

We provide a flexible and collaborative approach to planning and strategy development, from ideation (including business case writing), all the way through to live service and subsequent continuous improvement. We have a dedicated project management office that specialises in technology delivery and have experience at all stages of the programme lifecycle, including supporting service development from pre-alpha onwards.

We do this through a proven, GDS aligned, Agile Scrum and PRINCE2 wrapped methodology, combined with ITIL-based operational service delivery (using our award-winning DevSecOps capability). Our preference is to work openly through sprints with customers and partners, using a one-team, one-goal approach, and use a continuous delivery principle to provide demonstrable benefit as early as possible in all of our work.

Whilst implementation phases are run as a series of Agile sprints, the inputs, outputs and processes governing them are closely monitored and tightly controlled. Project plans are aligned with deliverables and a burn-up of points is used to provide clear activity status, leading to a high degree of confidence in milestones.

B Corp Sustainability Partner

Sustainability isn't a choice; it's a responsibility

Our commitment to sustainability is embedded into every aspect of our business. From the very beginning, our ambition has been to build a values-first organisation where technology specialists are empowered to thrive and create meaningful, lasting impact.

Every day, we live our mission from attracting top talent and winning new customers to securing investment from Bridgepoint DC and receiving Great Place to Work certifications in both the UK and India. Our people, customer, investors, and community expect us to lead the way by following a sustainable strategy, and we are more than ready.

Through our relentless pursuit of purpose-driven impact, we accelerate the way we make a difference. One thing's for sure: we'll always keep evolving, raising the bar for a smarter, more sustainable future.

Terms & Conditions

All Services provided are governed by the G-Cloud 15 Framework Terms and Conditions. Additional Terms may apply dependent upon the service being purchased; these may include:

- **Licensing requirements**

Licenses and subscriptions are the customer's responsibility, except where Kerv is explicitly engaged to deliver licenses and subscriptions within the service Kerv is able to provide licenses to support your project via the cloud solution provider route. Please enquire or view our software listings on G-cloud.

- **Data Privacy**

Data privacy agreements/GDPR

Your Obligations

*In order to deliver the service, we may require:

- **Secure Access**

Access to VPNs and internal systems may be a requirement based on the work undertaken

- **Collaboration**

Access to key stakeholders required to ensure smooth service delivery, using modern collaboration tools

- **Requirements**

Information to help us plan service onboarding, typically discovered through documented initial questionnaire and live discovery workshops

About Kerv

We help your business get ahead - and stay there.

Tech should put people first, so culture is crucial. Combining ingenuity and emotional intelligence, we use advanced technology to solve your trickiest problems in smart and human-centred ways.

Kerv Digital continues Kerv's mission of delivering disruptive tech with business and social impact. Whether you want to increase productivity or make better decisions, we use custom accelerators to get you ROI in record time. Get ready for digital transformation done different.

Data

Exploit your data to make more informed decisions. We'll help you harness Microsoft Dataverse, Artificial Intelligence and predictive insights to uncover hidden opportunities and get ahead.

Experience design

Get to the root of your problems and prototype solutions at Design Thinking and Catalyst Workshops. Then we build the intuitive, accessible tech that meets your unique needs.

Software development

Don't spend on problems we've already solved. Component-led design means we've got a huge library of problem-solving code and add-ons. Which makes your bespoke software more economical.

DevSecOps

Maximise uptime and regularly deploy updated code through industry-leading CI/CD approaches. We've supported some of the UK's largest live software deployments.

Microsoft Power Platform

Building on Microsoft Power Platform and adding our accelerators and Centre of Excellence support, we'll help you improve and innovate across multiple departments and business cases.

Microsoft Dynamics 365

Take the problem-solving capacity of Microsoft Dynamics 365 to another level for your business - with our user experience design and free, sector-specific accelerators.
