SCRAM SYSTEMS

Pricing includes equipment maintenance, consumables, product shipping and delivery (excluding taxes, customs and import duties), 24/7 support, initial training, account management and support, implementation, and transition costs.

**24 Hour Customer Support**

SCRAM Systems customer support is available 24 hours a day to provide advice, trouble-shooting, and daily reporting in relation to offender monitoring and compliance. Evidentiary reports and court testimony are also provided upon request.

**Maintenance**

Maintenance of SCRAM technology is managed by an automated system, which notifies SCRAM Systems of any maintenance work required. With the assistance of our UK warehouse, SCRAM Systems facilitates all maintenance of equipment (including device calibration) at no additional costto the customer. SCRAM Systems will endeavor to provide replacement of equipment that requires maintenance, prior to the return of the devices.

**Consumables**

Consumable items include buckles, batteries, faceplates, device exhausts caps and tamper clips are provided at no additional costs to the customer. Straps are designed to be re-used.

**Training**

SCRAM Systems will provide training for anyone who will manage equipment or offenders. The training covers set-up procedures for the web-based monitoring software (SCRAMNET), offender and inventory management, and all functional aspects of the hardware/equipment tasks. All initialSCRAM Systems training is provided and included at no additional cost.

Product and industry training is conducted through a combination of the traditional classroom, instructor-led setting and enrolling students in self-paced, online courses in SCRAM Systems University—our online learning management system (LMS). Training courses include a quiz to ensure that the main concepts of the module have been grasped before the student moves onto the next module. Each of the training courses also contains an end-of-course exam that must be completed before a certificate of completion is created in the university.

The Level 1 Training is a Basic System Operations course that includes an introduction to initial SCRAMNET setup procedures, daily tasks, and on-going maintenance. The course contains information on how to establish the hierarchy in SCRAMNET, making it easy for the user to manageclients, cases, equipment, and reports. Data interpretation is covered at a high level along with the multiple ways that data can be accessed and reports

generated.

In addition to the initial training, all training and written documentation is available online at SCRAM Systems University.

**Online Training.** Online SCRAM CAM training is accessible from the SCRAMNET Help page at anytime, at no additional cost.

**Refresher Training.** All existing training programmes are also available online, which allows staff to be trained when hired. If formal refresher training is required, SCRAM Systems can accommodate this requirement.

**Documentation.** The latest versions of all SCRAM CAM documentation are available online to reference and download. In addition, SCRAM Systems has a very detailed Help page functionalitythrough SCRAMNET. The content within the Help page is regularly maintained. Help features and functionality include:

- SCRAM Systems Operations Guide: Facilitates management of an efficient SCRAM CAM Programme.

- Quick Sheets: Stand-alone procedures that provide step-by-step directions to assist withSCRAM CAM equipment tasks, such as equipment setup, equipment replacements, and manual data uploads.

## Addtional Costs

Additional training beyond the initial training during programme implementation will be assessedand the following charges may apply:

| Additional Training and Specialist Equipment Costs | |
|---|---|
| Training fee for 3 hours (a maximum of 12 hours is usuallyrequired per event). | **£500** |
| Specialist equipment cost per tag installer/de-installer | **£150** |
