

Synanetics

Advancing Healthcare
Through Interoperability

GCloud 15 – Integration Services including Cloud Hosted Integration Engines

Synanetics offers a full range of services to organisations who wish to deploy our cloud hosted integration engine, or to take advantage of our full service offer for the deployment, development and support for all of the major integration engine offers used by the NHS. We are well versed in the major topics of modern healthcare technology and support the use of standards such as HL7, FHIR and IHE to build open infrastructures. We provide strategic advice and consultancy as well as operational support with onboarding, development of data connectors, operations, support and implementation services.

Implementation services include, project planning, drafting of information sharing agreements and information governance consultancy, clinical safety audits, provision of training for clinicians, architects and developers. Implementation costs vary by deployment and are not provided here.

Consultancy and Development Packages

We have a multi-disciplinary team with skills in technical architecture, healthcare standards, communications technologies, application development, interface development and service provisioning. We would like to make these skills available to you as fluidly and economically as we can

The following packages are pre-purchase options and assume that the number of days purchased will be used within 12 months from the purchase date. Our time is charged in minimum units of 4 hours.

10 Days	£1,050 per day.
50 Days	£985 per day.
75 Days	£945 per day.
100 Days	£900 per day.

Days purchased under a package are billed in the calendar month that they are worked. On contract renewal, unused days are automatically carried forward to the new contract. If the contract is terminated or not-renewed then any unused days are immediately billable. Ad-hoc days are always available. Our current rate is £1,280 per day.

All costs are exclusive of VAT.
