

Specialist Delivery Partner Service

VERACITY

1. Service Overview

The Specialist Delivery Partner service provides critical delivery support, guidance and expertise to help organisations deliver against their business needs, digital portfolio goals, strategic objectives and transformation project/programme outcomes. We deploy a flexible, scalable and tailored service at pace, delivering best practice, agile methodologies and championing collaboration across a multi-supplier landscape.

2. Detail of Service Delivery

Within the Specialist Delivery Partner service, we can deliver all aspects of a digital solution. Typical services we will provide include business analysis, user research, service design, enterprise, solutions, technical and data architecture, development (fullstack, database), test management, DevOps development, product management and delivery management.

We will oversee all aspects of the delivery but are happy to work with customer resources or third parties for any elements as required, providing a single point of contact to coordinate a plurality of resources.

3. Onboarding Activities

The team providing each work package to the customer is comprised of our resources specifically selected for delivery of the appropriate service, ensuring customers are provided with the specific skill sets that will best deliver the services required. Before they start an assignment, our team will be briefed in detail by our engagement leader on the services required by our customer, the broader strategy and aims of the work being procured and the service outcomes the customer is seeking through our engagement. Our engagement leader will work with our customer throughout delivery to ensure expectations are continually met and the service is delivered as required.

4. Service Management

All customers are provided with a dedicated engagement leader who will be responsible for overseeing the delivery of the service. They will maintain close contact with the customer and with any resources deployed to monitor customer satisfaction and to identify any issues at an early stage. We also gather feedback at the end of each assignment either formally or informally to ensure continuous improvement.

5. Service Constraints

There are minimal constraints on the service we can provide to customers. In order to meet the needs of customers, we can quickly scale our team by drawing on our pool of high-calibre professionals and deploy these flexibly to customers to meet service delivery requirements as required. Our teams can be delivered at short notice and on a short term or long term basis.

6. Service Levels

Our consultants and delivery teams are generally available 8:30am to 6pm Monday to Friday, with access out of hours as required.

7. Ordering and Invoicing Process

We have a flexible ordering process. Generally, we accept enquiries by telephone, email or face to face. Where the service is ordered, we can assist with preparation of the G-Cloud Order Form if required including electronic signatures allowing customers to confirm the order immediately.

8. Termination Terms

Customers can generally terminate the service without cause with five working days' notice unless otherwise stated on the Order Form. Where there is a need to terminate earlier than this, we will normally seek to accommodate it wherever possible.

9. Customer Responsibilities

Customer responsibilities include the provision of access to customer offices, office space and, where appropriate, IT equipment. In addition, customers are responsible for providing details of the initiative and the nature of support required, participation in workshops and meetings as required, and for verifying the satisfactory completion of the work.
