

Programme, portfolio and project management to enable cloud transition

G-Cloud 15

We help public services
make progress on messy
problems using agile
approaches that improve
services quickly

Basis.
changing the change

Service Description

We provide programme, portfolio and project management with resources to help design, implement and embed your transition to the cloud.

Our team can provide services across the entire project lifecycle from project inception, options appraisal, business case and procurement through to implementation and overall governance.

We can provide consultants at any level within the PMO and can also source experienced resources to fill roles in an interim capacity.

For organisations working in an Agile environment we can also provide Scrum Masters and Agile Project Managers. These resources are able to quickly understand the problems your service needs to address, to prototype solutions to address those problems, to get feedback on those solutions, and to use this feedback in the design of cloud-based services to ensure they meet the needs of service users and of the organisation.

Our team has a deep understanding of public services and are able to quickly pull together multi-disciplinary teams to mobilise towards a shared vision.

Too many large cloud transition programmes fail because they are managed as long term, inflexible delivery projects; the end-to-end service is often not ready for a transition to the cloud. We support our customers to enable end-to-end service transformation, choosing a delivery approach that prioritises small, incremental progress that clearly moves towards an agreed vision.

Features

- Skilled facilitators familiar with cloud-based services
- Understanding service user needs through discovery
- Prototyping to understand the value of solutions to customers
- Visual project management and 'on job' training in Agile
- An iterative approach to project management
- Time-boxed approach to working to deliver value quickly
- Broad range of capabilities
- Available fully online. Not a virtual webinar, but engaging workshops

Benefits

- Fast-paced change initiative
- Delivery of value in short spans of time
- Creates an engaged workforce
- Builds on the skills and strengths already in place
- Develops new skills
- Embeds better practices
- Transparent approach to work engages the team and stakeholders
- Ensures end-to-end service is ready for transition to the cloud
- Services capable of reducing transaction costs and improving outcomes
- Adapt to and improve online working

Brief description

We provide programme, portfolio and project managers with knowledge in co-delivering iterative, Agile change to support your transition to the cloud. These individuals are skilled facilitators, capable of empowering multidisciplinary teams to self-organise and work collaboratively to deliver results quickly. We support all stages of the project lifecycle. Delivered online.

Introduction to Basis Ltd

We help public services tackle messy problems. We pioneered the use of Agile as a means of transforming services in the public sector. In the last 10 years, we've helped hundreds of services to improve outcomes for real people, quickly. Our peers and clients have recognised our approach and results. For seven years running (2019-2025) we have been identified as a leading management consultancy working in the Public and Social Sector by the Financial Times.

Our services have a wide range of applications for cloud-based services. We help our customers to understand service user needs, to design services that meet those needs using an Agile approach, and to support teams and leaders to embed those services beyond our intervention. We recognise that many public services, particularly in health and social care, continue to require relational interactions, as not all service needs can be met through digital solutions. We help customers to design

coherent, end-to-end services that encompass both the relational and digital components.

Effective 'click and mortar' public services meet the needs of the many and not just the few. These public services promote the adoption of cloud-based services; a small amount of support during early interactions can empower service users to transact online in the future.

Online delivery and facilitation

All of our services can be provided in person, or online; we are experts in virtual facilitation. Working online we have:

- Facilitated over 10 online Impact Sprints with social impact organisations and local authorities to understand the impact of COVID-19 on their communities and coordinate their response quickly
- Supported people and organisations to turn their events and training into online engagement ranging from – REN21 a Think Tank focussed on global renewable energy policy, Stockholm School of Economics EMBA programme, a coaching programme in Virginia (US), and youth engagement for Generations for Peace (Amman, Jordan)
- Designed and facilitated a global conference for the Alliance for Child Protection in Humanitarian Action attended by over 500 delegates
- Built the capacity of teams in local government, UNESCO, Unicef and the UN Disarmament Directorate to run virtual events with international participation

Get in touch

All of this is probably best talked through and we are keen to do so. Let us know when works for you, and we'll book in a call.
