Cloud Support & Consultancy

EDGEBITS

Cutting Edge Healthcare IT

EDGEBITS PROVIDING CONSULTING AND SUPPORT TO MEET YOUR DIGITAL SERVICE NEEDS

OUR SERVICES

CONSULTANCY & SUPPORT

EDGEBITS offers support to diverse healthcare and other public sector organisations to successfully deliver extensive strategic and business transformation programmes.

We are dedicated to delivering quality and success in partnership with our clients. Our principles of building long term relationships, listening carefully to clients' needs and delivering on our promises are fundamental to the way we work.

We begin by clearly understanding priorities and challenges and then guiding clients so that they can prioritise resources effectively and ensure that investment remains tightly aligned to business goals.

Our team invests time with key stakeholders to build a tailored strategy, one that works for you and is achievable within your available resources and delivers the most for your business.

We facilitate and collaborate with clinicians and stakeholders across organisations to deliver effective and innovative service development and redesign, business transformation and the realisation of organisational strategic and commercial ambitions.

PROFESSIONAL SERVICES

Our comprehensive range of professional services combine best practice with commercial pragmatism. They are designed to work with clients, supporting them to achieve their business goals and to create value for their organisation. We enable our clients to increase productivity, accelerate growth and deliver outstanding user experiences.

DIGITAL & IT Services

We support, facilitate, and enable our clients to achieve success in delivering complex and robust IT solutions by combining industry know how with our pragmatic and outcome driven methodology.

EDGEBITS has extensive experience of undertaking business analysis and delivering change and innovation through technology. Our fully configurable mobile print application (EDGEPRINT) was developed by our team in response to the mobile working needs of primary care and the delivery of efficient and effective patient care.

We successfully developed and delivered digital transformation for a large number of NHS trusts. Our team employed the latest digital technologies to transform care and to improve health outcomes. We have the capacity and expertise to implement emerging digital technologies and to support you to achieve your digital agenda.

BENEFITS OF WORKING WITH US

Flexible and Fully Scalable Delivery Models:

We have a highly experienced and knowledgeable team that can be scaled and adapted to meet your project and organisational needs. We have the capacity and capability to effectively manage and successfully deliver large scale and complex projects and programmes. We aim to deliver solutions that meet current needs and provide a platform for future developments.

Extensive Experience: Our company has over 20 years' experience of Specialist NHS Information Technology Solutions and of providing Health Planning and Development Consultancy and Support. We have achieved large scale and radical digital upgrades for NHS trusts including CCGs, community health services and Acute Hospital Trusts. Our team has supported more than 500 GP practices across the country with digital transformation of the GP IT Estate. We also have wide ranging experience of developing and delivering clinical service reviews and service redesign.

Stakeholder Management: We engage with all stakeholders to understand key requirements, potential enablers, and opportunities as well as the challenges likely to impact on time and cost-effective service delivery. Our successful stakeholder engagement approach includes managing expectations and building, maintaining, and coordinating effective relationships between all parties from the frontline to the C-Suite.

Bespoke Project and Programme Management:

Industry standards and best practice methodologies are applied to all project/programmes undertaken on behalf of our clients. Our flexible approach ensures delivery of tailor-made options that support our clients' projects and programmes whilst expertly balancing transformation and 'business as usual' priorities. Our team is able to rapidly identify our clients' business requirements and to mobilise at pace and to achieve effective end-to-end delivery and full lifecycle project management.

Responsive: We work collaboratively with our clients, their team, and their stakeholders to identify the solutions that will best meet their needs. Effective business analysis and requirements gathering are essential for the delivery of quality and financially viable customer solutions. We have an adaptable and solution focussed approach to problem solving. Our team recently developed EDGEPRINT, a fully configurable mobile print application, in direct response to the needs of primary care clinicians for a true mobile working solution across the GP IT Estate.

Value for Money: Our approach provides a flexible pricing model driving competitive pricing whilst avoiding a 'one size fits all' approach. We can facilitate the use of Time and Materials or Fixed Cost Pricing models to meet our clients' needs and to ensure that our service provides both quality and value for money.
