Microsoft Azure

Pricing for the Azure platform is generated via the Azure Pricing Calculator which can be found online at <https://azure.microsoft.com/en-gb/pricing/calculator/>

We have a dedicated Cloud Services Team who are available to provide any support and guidance to build and design the required Azure specification to meet requirements.

Once the specification has been agreed and updated in the pricing calculator, the accurate estimate will be submitted in the form of an Azure pricing workbook which may contain additional pricing for management and professional services as detailed below.
