Microsoft Teams Governance, Provisioning and Lifecycle Management with Orchestry

Microsoft 365 Workspace Governance, Provisioning and Lifecycle Management with Orchestry

A cloud-hosted platform designed to streamline workspace provisioning, enforce governance, and manage lifecycle activities across your organisation. This service empowers organisations to reduce manual administration, maintain compliance, and ensure a consistent, structured workspace environment for all users.

By leveraging iThink 365 with Orchestry, organisations can automate workspace creation, manage lifecycle workflows, and enforce governance policies with built-in security controls. Administrators and end-users benefit from repeatable, software-driven processes that simplify management, prevent duplication, and ensure meaningful collaboration across the business.

Whether controlling onboarding, automating archival, or providing pre-built workspace templates, Microsoft 365 Workspace Governance and Lifecycle Management Services enable organisations to work more efficiently, improve adoption, and maintain oversight across hybrid and frontline teams.

Microsoft 365 Workspace Governance & Provisioning Accelerator

Transform workspace management with automated provisioning and lifecycle controls. This platform allows organisations to deploy workspaces securely, enforce compliance, and manage workspace lifecycles using automated workflows. Cloud-based templates, approval workflows, and administration dashboards make it easy to maintain a consistent, organised Teams environment while empowering end-users to collaborate effectively.

Why Choose This Service?

- Automated workspace provisioning and full lifecycle management
- Guest management with controlled access and governance
- Take control of your Microsoft Entra ID Guests with lifecycle management and approval processes to ensure only the right people are added to your central identity repository and removed when no longer needed
- Built-in governance, approval workflows, and compliance controls
- Automating archival processes to tidy up inactive workspaces and ensure data hygiene
- Integration with Microsoft 365 for seamless collaboration
- Pre-built templates for rapid deployment and standardisation
- Scalable architecture that grows with your organisation

What You'll Gain

- Simplified workspace management and improved adoption
- Minimised workspace sprawl and redundant workspaces
- Clear oversight through dashboards and reporting
- Efficient lifecycle management, including archival and retention actions
- Consistent governance and meaningful workspace usage

Platform Highlights

- Cloud-hosted workspace governance and lifecycle management
- Pre-built templates, approval workflows, and reporting dashboards
- Automated notifications, archival, and lifecycle actions
- Role-based access and enterprise-grade security
- Scalable architecture for hybrid and frontline teams

About iThink 365

iThink 365 helps organisations succeed with Microsoft 365 by strengthening the core pillars that modern businesses rely on: collaboration, communication, business processes, knowledge management, and data-driven decision-making. We deliver secure, cloud-hosted solutions and services that make it easier for teams to work together, share information consistently, and reduce day-to-day friction, so people spend less time on admin and more time on the work that moves the business forward. Through practical workshops and roadmap-led guidance, we help leaders understand what's possible across Microsoft 365 and prioritise the initiatives that will deliver the most value, quickly and safely.

Our portfolio brings these pillars to life across the Microsoft Cloud, from AI and Microsoft 365 Copilot services (enablement, governance, Copilot Studio solutions, and agentic AI agents for business processes) to Power Platform solutions (Power Apps, Power Automate, Power BI and AI Builder), intranet and digital workplace accelerators, and Teams/SharePoint business system integration that connects HR, CRM, finance and other line-of-business systems into the flow of work.

We also provide Microsoft 365 analytics and reporting to measure adoption and uncover improvement opportunities, plus Microsoft 365 and SharePoint migration services to modernise collaboration safely with minimal disruption. Where customers want ready-to-use capability, our iThink Connect product range, including SmartFlo, adds practical, people-first automation inside Microsoft 365 to reduce manual effort and keep work moving.

Everything we offer is designed to be scalable, configurable, and governed, helping organisations build a secure, future-ready foundation for productivity and growth.
