

DevSecOps and Policy-as-Code Enablement

La Fosse Capability

Embedding security and compliance directly into digital delivery pipelines

La Fosse helps organisations integrate security and compliance into software delivery using DevSecOps and policy-as-code practices. We design secure CI/CD pipelines, embed automated testing and controls, and implement reusable policy frameworks. Our approach enables teams to release software faster while meeting assurance, audit and regulatory requirements through consistent, repeatable controls.

Secure delivery pipelines

Security controls integrated directly into CI/CD workflows

Policy-as-code

Automated enforcement of standards and compliance rules

Automated testing and assurance

Static, dynamic and dependency scanning built into delivery

Repeatable governance

Templates and controls supporting audit and assurance needs

- **Secure CI/CD pipeline design**
- **Automated security and compliance controls**
- **Policy-as-code implementation**
- **Developer enablement and assurance**

1

Assess and design

Review delivery pipelines, security risks and compliance requirements

2

Embed and automate

Integrate security testing, controls and policy-as-code into pipelines

3

Enforce and assure

Apply automated checks, reporting and evidence generation

4

Enable and optimise

Provide templates, training and guidance for sustainable secure delivery

Proven public sector impact

La Fosse embeds security into delivery by automating controls and policies within development pipelines. We help organisations reduce risk and improve compliance without slowing delivery, ensuring secure-by-design practices are consistently applied.

Secure delivery
enablement in
operational services

Delivered DevSecOps support to embed automated testing and security controls into live service delivery.
Outcome: Faster secure releases, reduced manual checks and increased delivery confidence.

Security automation
and assurance uplift

Supported the integration of automated security controls and assurance reporting within data and analytics delivery pipelines.
Outcome: Improved auditability, fewer release defects and stronger security assurance.

Secure delivery
pipeline enablement

Provided DevSecOps and security-automation expertise within secure, multi-supplier government programmes.
Outcome: Improved compliance, reduced security risk and faster, more predictable releases.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
