

Secure Supply Chain (SCRM) and SBOM Governance

La Fosse Capability

Reducing software supply-chain risk through transparency and control

La Fosse helps organisations manage software supply-chain risk by implementing SCRM controls and SBOM governance across the delivery lifecycle. We provide visibility of third-party components, dependencies and licences, and embed processes to identify, assess and remediate risk. Our approach strengthens assurance, improves vulnerability response and supports compliance with government security expectations.

Supply-chain processes

Clear inventory of components, dependencies and third-party risk

SBOM governance

Creation, validation and management of software bills of materials

Vulnerability management

Rapid identification and remediation of component-level vulnerabilities

Assurance and compliance

Evidence and reporting supporting secure software assurance

- **Software supply-chain risk assessment**
- **SBOM creation and lifecycle management**
- **Dependency and vulnerability monitoring**
- **Governance and assurance reporting**

Proven public sector impact

La Fosse strengthens software assurance by making supply-chain risk visible and manageable. We implement SBOM governance and monitoring controls that enable organisations to understand dependencies, respond quickly to vulnerabilities and maintain confidence in the software they operate.

Secure software
governance for
national services

Office for
National Statistics

Supported software assurance and dependency governance across nationally significant data services.
Outcome: Clear component visibility, improved risk management and enhanced audit confidence.

Secure delivery
governance
enablement

Professionals

Delivered governance and assurance support to strengthen control over software components and dependencies.
Outcome: Reduced supply-chain risk and improved confidence in software releases.

Supply-chain
assurance within
secure delivery

leidos

Provided supply-chain security and assurance expertise within secure, multi-supplier government programmes.
Outcome: Improved visibility of third-party risk, faster vulnerability response and stronger assurance controls.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
