

Data Management and Governance

La Fosse Capability

Establishing trusted, well-governed data across the organisation

La Fosse helps public sector organisations establish effective data management and governance frameworks that ensure data is accurate, secure and reusable. We design governance models covering ownership, quality, lineage and compliance, aligned to CDDO data standards and ICO requirements. Our approach embeds practical controls, tooling and skills transfer to support sustainable, organisation-wide data stewardship.

- **Data governance operating models**
- **Ownership, stewardship and accountability**
- **Data quality, lineage and cataloguing**
- **Compliance and assurance controls**

1

Assess and baseline

Review current data governance maturity, risks, roles and regulatory obligations

2

Design governance framework

Define policies, ownership models, quality controls and governance processes

3

Implement and operationalise

Configure catalogues, workflows, dashboards and supporting controls

4

Embed and sustain

Transfer knowledge, establish reporting and support continuous governance maturity

Proven public sector impact

La Fosse establishes practical data governance by combining framework design with hands-on delivery. We define ownership, quality controls and assurance processes, and support teams to embed governance tooling and practices that ensure compliance, trust and long-term sustainability.

Data governance
framework and
assurance

Supported the development of data governance, quality controls and assurance across nationally significant data services.

Outcome: Improved data quality, clearer ownership and stronger compliance confidence.

Operational data
governance and
stewardship

Delivered data governance and management support to improve oversight of high-volume operational and case data.

Outcome: Reduced data risk, improved consistency and clearer accountability.

Data governance
enablement within
transformation

Provided governance and data-management support as part of wider regulatory and operating-model transformation.

Outcome: Improved data assurance, stronger governance controls and better regulatory insight.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
