

Quality Assurance and Test Engineering at Scale

La Fosse Capability

Building confidence in digital services through assured, scalable testing

La Fosse provides quality assurance and test-engineering services that embed testing across the full delivery lifecycle. We deliver functional, non-functional, automation, performance and security testing at scale, integrated into CI/CD pipelines. Our approach reduces release risk, improves service reliability and supports government assurance and release-management requirements.

End-to-end testing coverage

Functional, non-functional, performance and security testing

Automation at scale

Reusable automated test frameworks integrated into pipelines

Release assurance

Evidence-based assurance supporting go-live and change control

Quality metrics and insight

Clear reporting on defects, coverage and risk

- **Test strategy and assurance planning**
- **Automated testing and CI/CD integration**
- **Performance, security and non-functional testing**
- **Quality reporting and governance**

1

Define and plan

Assess delivery approach, risks and assurance requirements

2

Design and build tests

Develop manual and automated test assets and environments

3

Execute and assure

Run testing cycles, manage defects and support release decisions

4

Embed and optimise

Transfer capability, optimise automation and improve quality maturity

Proven public sector impact

La Fosse delivers quality assurance by embedding testing into delivery from the outset. We help organisations reduce release risk and improve service reliability through scalable testing, automation and evidence-based assurance.

Quality assurance for national digital services

Office for National Statistics

Provided QA and test-engineering support across data and digital delivery programmes.

Outcome: Reduced release defects, improved reliability and stronger assurance confidence.

Testing and assurance within complex programmes

leidos

Delivered large-scale testing and quality assurance within secure, multi-supplier government environments.

Outcome: Improved release control, reduced operational risk and consistent quality standards.

Operational service testing enablement

Professionals

Supported functional and automated testing to improve stability across live digital services.

Outcome: Fewer production issues, faster regression testing and improved service confidence.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
