

# Software Engineering and Application Development Services

---

**La Fosse Capability**

# Designing and delivering secure, scalable digital applications

La Fosse provides software engineering and application development services to design, build and operate modern digital services. We supply agile engineering teams to deliver cloud-native, API-led solutions using secure-by-design practices. Our approach ensures applications are scalable, resilient and aligned to GDS and government technology standards.

Full lifecycle delivery

**Design, build, test, deploy and support digital applications**

Modern engineering practices

**Cloud-native, API-led and microservices architectures**

Security-by-design delivery

**Security embedded throughout the development lifecycle**

Outcome-based delivery

**Flexible delivery via SOWs and agile squads**

- **Full-stack and cloud-native software engineering**
- **Agile delivery teams and DevOps automation**
- **Secure application and API development**
- **Legacy modernisation and system re-engineering**

1

### **Discover and design**

Understand user needs, architecture, standards and delivery outcomes

2

### **Build and integrate**

Develop applications, APIs and integrations using agile practices

3

### **Test and deploy**

Automate testing, deploy via CI/CD pipelines and assure quality

4

### **Operate and evolve**

Support live services, optimise performance and transfer capability

# Proven public sector impact

La Fosse delivers software engineering services that combine modern development practices with strong governance and assurance. We help organisations build secure, scalable digital applications while embedding capability and reducing long-term technical risk.

Digital service delivery  
at scale

Department  
for Transport

Provided engineering capability supporting the design and delivery of user-facing digital services.

**Outcome: Faster delivery, improved scalability and better alignment to GDS standards.**

Engineering delivery  
within complex  
programmes

leidos

Delivered software engineering expertise within secure, multi-supplier government environments.

**Outcome: Reduced delivery risk, improved resilience and controlled system integration.**

Operational application  
development

Professionals

Supported development and enhancement of digital applications underpinning critical services.

**Outcome: Improved service reliability, better user experience and sustainable delivery capability.**

# Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
