

Enterprise Architecture and Technology Strategy

La Fosse Capability

Aligning business ambition with scalable, secure technology foundations

La Fosse partners with public-sector organisations to design enterprise architectures and technology strategies that align digital, data, and infrastructure investments to long-term business goals. We assess current capabilities, define future state models, and build transition roadmaps that enable interoperability, control, and measurable return on investment.

Embedding

Embedded within departmental architecture governance and standards frameworks

Collaborating

Collaborative design across business, data, and technology domains

Knowledge sharing

Knowledge-sharing and skills transfer integrated into every engagement

Flexibility

Flexible support spanning architecture strategy, delivery, and assurance

- **Embedded within client governance and reporting structures**
- **Transparent performance management and single-point accountability**
- **Knowledge-sharing and upskilling baked into every engagement**
- **Flexible team composition based on client needs**

1

Assess and baseline

Evaluate current architecture maturity, technology landscape, and alignment to business objectives

2

Design and define

Develop target architecture models, governance frameworks, and standards for interoperability

3

Plan and implement

Create transition roadmaps, investment prioritisation models, and operating blueprints

4

Govern and evolve

Establish continuous architecture review, assurance, and improvement cycles

Proven public sector impact

La Fosse enables organisations to modernise and govern their technology landscapes with clarity and control. Our enterprise architects bring deep experience in TOGAF, MODAF, and government technology frameworks, helping clients rationalise complexity, strengthen governance, and accelerate digital transformation.

Technology strategy
and portfolio
alignment

Supplied senior solution and enterprise architecture expertise to support portfolio-wide technology decisions and align initiatives to strategic business objectives.
Outcome: Clearer technology direction, improved interoperability, and strengthened governance across complex change initiatives.

Architecture
governance and
standards enablement

Provided enterprise and security architecture specialists to develop standards, reference architectures, governance across large-scale cyber programme.
Outcome: Improved architectural assurance, increased resilience, and clearer alignment between security and technology strategy.

Enterprise architecture
and roadmap definition

Delivered enterprise and data architecture capability to define target-state models, strengthen governance, align technology investment across a national digital transformation portfolio.
Outcome: Improved architectural consistency, reduced duplication, and stronger portfolio-level governance and assurance.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.

Thank you
