

Observability and AIOps Enablement

La Fosse Capability

Improving service reliability through proactive, data-driven operations

La Fosse helps organisations implement end-to-end observability and AIOps capabilities to improve the reliability and performance of live digital services. We design telemetry, monitoring and alerting frameworks, and apply analytics and automation to predict and resolve incidents earlier. Our approach reduces operational noise, improves availability and enables operations teams to manage services with confidence.

End-to-end observability

Metrics, logs and traces across applications, platforms and infrastructure

Intelligent alerting

Correlation and noise reduction using analytics and AIOps techniques

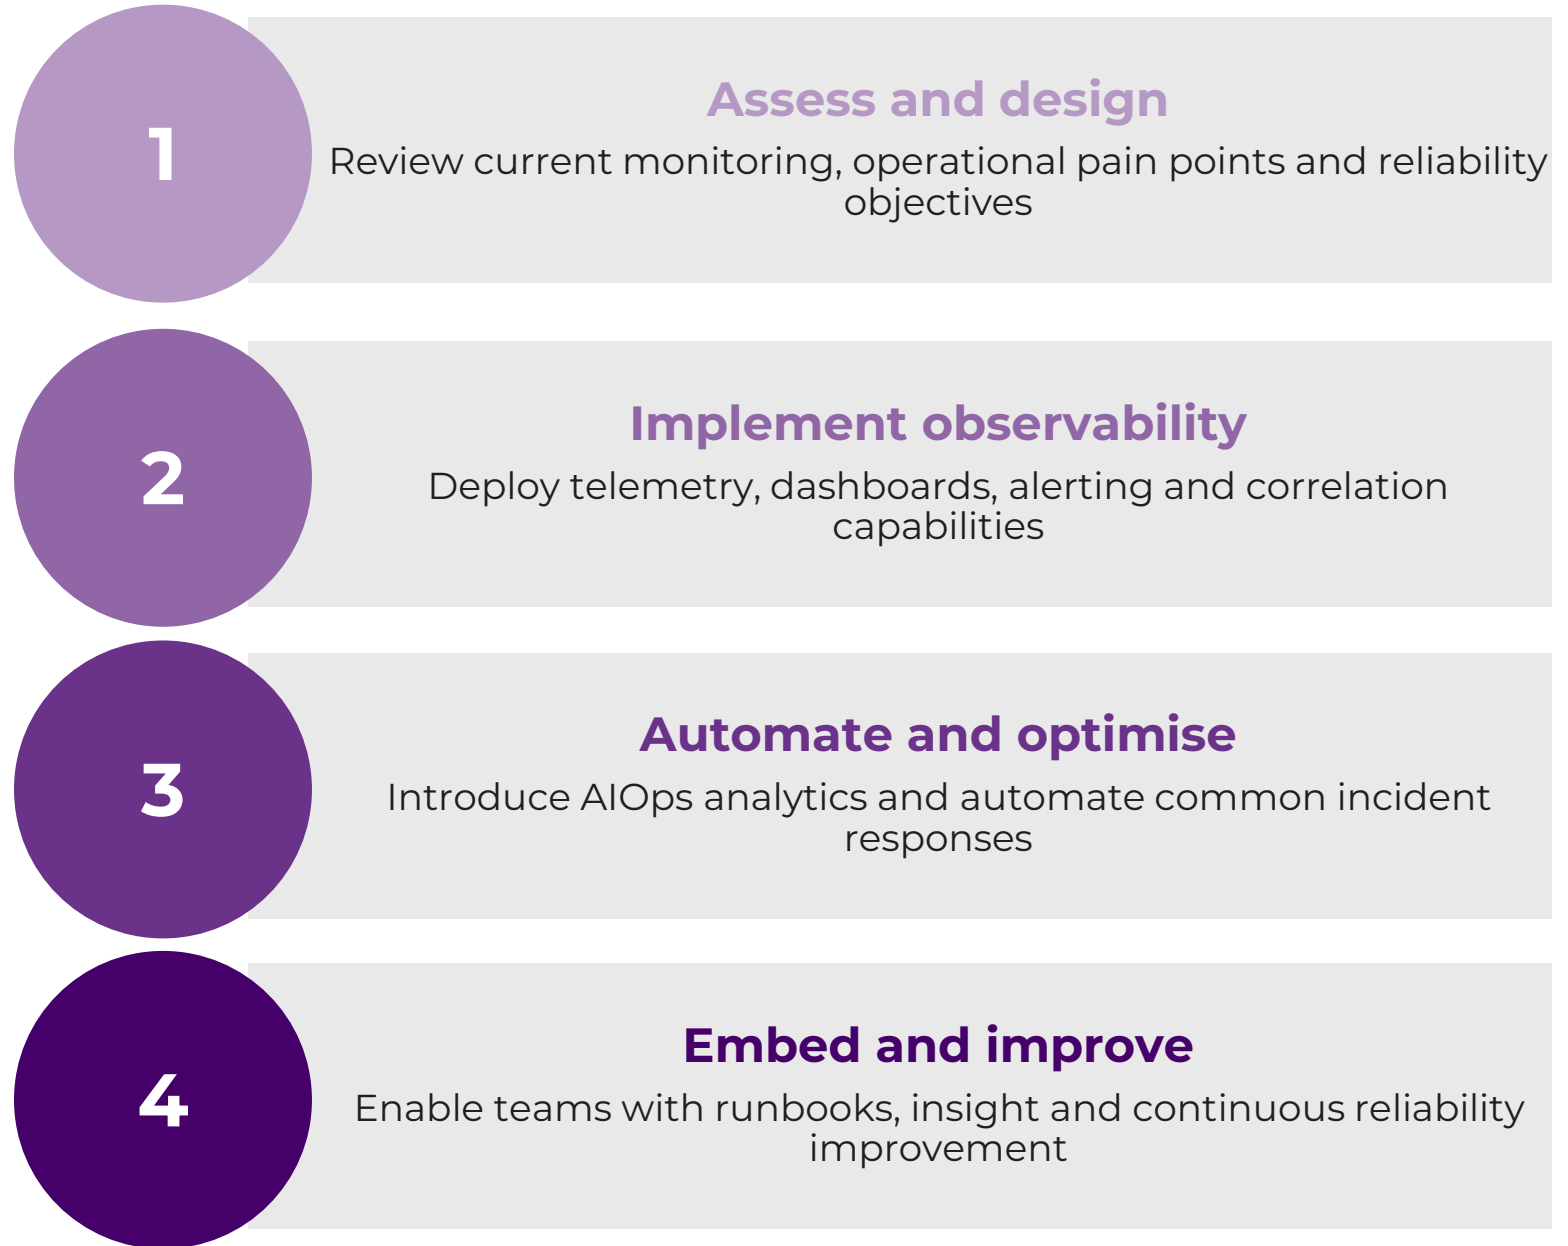

Operational automation

Automated responses to common incidents and operational tasks

Service reliability insight

SLO dashboards and performance reporting for assurance and improvement

- **Unified observability across services and platforms**
- **AIOps-driven alert correlation and insight**
- **SLOs, dashboards and reliability metrics**
- **Incident automation and operational enablement**

Proven public sector impact

La Fosse enables reliable digital operations by combining observability foundations with intelligent automation. We help organisations move from reactive monitoring to proactive, insight-led operations that improve availability, reduce noise and strengthen service resilience.

Operational monitoring
and automation
enablement

Delivered observability and automation support to improve operational confidence across live digital services.

Outcome: Reduced incident resolution times, fewer manual interventions and improved service stability.

Observability and
reliability uplift

Supported the implementation of observability and performance insight across nationally critical data services.

Outcome: Faster incident detection, improved availability and clearer operational visibility.

Operational assurance
within secure
environments

Provided monitoring, automation and reliability expertise within complex, secure government delivery programmes.

Outcome: Improved service resilience, reduced operational risk and stronger assurance.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
