

Identity and Access Management / Zero Trust

La Fosse Capability

Strengthening access control and trust across modern digital environments

La Fosse helps organisations design and implement robust identity and access management and Zero Trust capabilities across hybrid environments. We assess identity maturity, consolidate identity providers, implement strong authentication and define policy-based access controls. Our approach reduces unauthorised access risk, improves auditability and supports compliance with recognised Zero Trust principles and government security standards.

Identity governance

Clear ownership, lifecycle management and access accountability

Zero Trust controls

Policy-based access enforcing least privilege and continuous verification

Strong authentication

Multi-factor authentication and privileged-access management

Audit and compliance

Centralised logging, reporting and evidence for assurance

- **Identity governance and lifecycle management**
- **Zero Trust architecture and policy enforcement**
- **Privileged access and strong authentication**
- **Centralised audit and access visibility**

1

Assess and baseline

Assess identity maturity, access risks, tooling and regulatory requirements

2

Design and define

Design Zero Trust architecture, access models and identity governance controls

3

Implement and integrate

Configure IdPs, MFA, PAM and policy-based access across environments

4

Assure and embed

Establish monitoring, audit reporting and operational guidance for ongoing compliance

Proven public sector impact

La Fosse accelerates the safe modernisation of legacy systems through a structured, factory-based migration approach. We assess readiness, manage dependencies, plan remediation and deliver controlled migration waves using automation and DevOps practices.

Identity governance
and access control
uplift

Supported identity and access control improvements across nationally critical digital and data services.
Outcome: Reduced access risk, improved audit visibility and stronger alignment to Zero Trust principles.

Access governance
and operational
enablement

Delivered identity governance and access-management support across complex operational systems.
Outcome: Clearer access ownership, improved policy enforcement and enhanced audit confidence.

Privileged access and
security control
implementation

Provided IAM and security specialists to support privileged access management and secure identity controls in government programmes.
Outcome: Improved control of high-risk accounts, reduced security exposure and stronger compliance.

Delivering positive, lasting impact beyond project outcomes

We're an employee-owned business that believes transformation should empower people as much as technology. Every engagement builds confidence, inclusivity, and self-sufficiency within client teams.

Sustainability and climate

Eco-conscious operations, reduced travel, digital-first engagement, social sustainability through charitable partnerships.

Inclusion and opportunity

Diverse delivery teams, fair pay, early-career pathways via La Fosse Academy.

Wellbeing, culture and communities

Consultant communities, prioritising mental and physical wellbeing, transparency and healthy working practices.

A woman with dark hair in a ponytail is seen from behind, looking out of a train window. The background is blurred, suggesting motion. The entire image has a purple overlay.
