| ✓ Simple Courses | ✓ ISO 27001 Certified |
| ✓ Simple Enrolments | ✓ Documentation and Training |
| ✓ Data Validation | ✓ Option to move to Evolution Standard |

Funding and Statistics

Offering one of the most in depth and competitive funding modules available that will power your complete funding requirements, whilst retaining historic information for reference and analysis.

Learners

As the basis for all users, a good Learner system is vital to the successful running of a modern MIS System. You are not limited on the number or nature of Learners, year by year or by license, rather all of your Learners are maintained for full use and analysis.

Reporting and Analysis

Reporting and analysis is the growing need of both management and administration. All versions come with a complete suite of reporting and analysis.

Multiple ILRs

You can create, upload and store as many ILRs as you need. These can be across multiple years. Edit the ILR data and create new ILRs. Also, ILRs can be merged, partially exported and reported upon.

Ofsted Analysis

Build in data analysis for Ofsted inspections, including progression and data drilling. This will give you a lot of the tools required for reporting to Ofsted prior to their visit and during an inspection.

Simple Courses

Record the basic course data that is used to power your ILR data without the complexity of full timetables, room bookings, etc. If you only need to know what courses you are providing then this is a simple option to use.

Simple Enrolments

Keep a track of what courses Learners have enrolled upon. It may be that a Learner is studying for a single Aim across multiple courses you can track the actual enrolments without the complexity of fee charging, attendance, etc.

Data Validation

Validate your data before it moves through the funding process.

Funding Income

Build the ILR funded income by Aim and by Learner for use in reporting and analysis.

ULN Data

Bulk export learners to the LRS service and bulk import the resultant ULN value. This simple process will help to ensure that your ULN data is up to date.

Security

The most complete security system available in the market, but delivered in such a way that it does not interfere with system use. With data protection issues being a continuing concern, you cannot afford to run an "open" system.

Why host with us?

Hosting with West March Systems helps you keep your IT overheads low, and lower still when you expand or change locations as there's no need to purchase expensive equipment for staff.

We use a patented connection solution that gives you access to your system using advanced encryption to ensure your data is safe and secure, yet you only need to use a standard web browser.

We will give you first class support without a lot of delays and bureaucracy.

Online Training

We provide live online training and remote online courses. These sessions go through all the basics from connecting into the system through to enrolment and payments, with additional sessions for administration, reporting and analysis, finance and any area that is required for running your service

Direct Support

We pride ourselves in the level and quality of our Support. Unlike many other Support Desks, we do not simply assign a ticket number and respond slowly. Our aim is to support users directly to a quick conclusion of their issues.

Book a Demonstration

We can give you an online demonstration of TERMS and take you through the system. Simply contact us and we will start the process.

Request a Quotation

Let us know the size of your service and we will give you a formal quotation for your system.
