VISCE Mobile application for Law Enforcement - ANPR

Service Attributes

Service Type – Cloud Software - Lot 2b

Service Name

VISCE Mobile application for Law Enforcement ANPR

About Your Service

Building on the NAS VISCE Management Server – Back Office for Law Enforcement – ANPR service, this provides real-time alerts and instant alerting in a Regulation 109 compliant format.

Service Features and Benefits

Features

- Real-time alerts from VOI Lists and Dynamic Alerts
- Instant alerting for users
- Vicinity alerts from nearby ANPR assets
- Allow users to enter Alert Outcome information for Management Reporting
- Searching of VISCE Management Server / Back Office
- Manually create ANPR events

Benefits

- Deliver ANPR intelligence direct to key users
- Allows mobile fleet to be ANPR aware using Regulation 109 compliant alerts
- Provide enhanced Management Reporting showing alert outcomes and demonstrating benefits of ANPR
- Provide a real-time view on the current location of VISCE Mobile users within VISCE Management Server / Back Office
- Manually created ANPR events are available for future searching and analytics
- User actions are derived using Role Based Access Control and Permissions
- All actions are fully auditable
