

SERVICES

OPERATIONALISING AI

Operationalising AI.

aiimi

Move from pilot to production — or from your organisation's first AI success story, to its fiftieth.

Deploying AI at scale in business means more than training Large Language Models or rolling out endless chatbots. The costs and complexities, including use case identification, value alignment, and data preparation, demand a smart, iterative approach.

Our AI consultants ensure a safe and secure integration, identifying opportunities, mitigating risks, and enabling businesses to effectively operationalise cloud-based AI technologies.

HOW WE HELP

We use our proven 'AI Labs' approach to evaluate your AI use cases, align to realistic value, and select the right technology for the job.

For successful candidate use cases, our services include:

- AI model selection
- User Experience design
- Data and platform readiness
- Data ethics and security
- AI build
- AI adoption

HOW WE HELP

Build lasting AI, with visible value.

We know how to navigate the data, technical, and organisational challenges that stop your AI programmes from sticking.

Test, learn, build – then scale.

Successfully embedding emerging tech means testing and learning. We build the experiments, pilots, and scalable implementations you need to unlock cutting-edge AI technologies for enterprise.

Solid infrastructure for AI foundations.

Scaling AI from 50 to 50,000 users needs robust infrastructure. We'll walk through everything you need – Cloud or on-premises compute, model hosting, and secure APIs and integrations.

Data pipelines that feed AI at scale.

Any conversation about AI is about data too. We'll make sure your data is ready for AI at scale, measuring quality and fixing availability, leveraging our expert data engineers and our data and AI platform.

Preparing your people.

Scaling AI isn't just about the tech. We work directly with your users to make sure they're comfortable with where AI fits in their workflow – and that it's delivering the value they need.

OPERATIONALISING AI

Features & Benefits.

Our expert services are designed to deliver maximum benefit with a flexible approach – here's what you can expect.

SERVICE FEATURES

- Agile, fast-track testing of Cloud AI value propositions
- Setting up AI Lab methodology to evaluate use cases
- Define and test AI use case value propositions
- Run experiments to ensure feasibility and quality
- Help selecting the most appropriate Cloud or on-premise AI models
- Development of production AI solutions
- UI and User Experience Design, Development, Testing and Adoption
- Workforce training: AI literacy, safety, and business risk strategy development
- Organisational data and document preparation for CoPilot deployments
- Development of governance models for AI solutions

SERVICE BENEFITS

- Rapidly deploy AI solutions to production
- Integrate AI solutions with corporate data sources
- Ensure ethical and safe use of AI
- Optimise processes, automate tasks, and solve complex problems
- Only implement solutions that have proven value
- Focused, impact-oriented roadmap design, including data governance and management requirements
- Guidance, process, and policy development to protect business, employees, and customers
- LLM prompt engineering
- User experience-centric design of AI interfaces and experiences to increase adoption

CASE STUDY OPERATIONALISING AI

Developing a three-year roadmap for high-value AI use cases.

“

“Aiimi has provided us with a detailed AI roadmap that addresses our unique, specific needs while having the flexibility to test and adapt as we go. Their research has helped us identify key areas that would benefit from AI and automation, but they’ve also given us broader insights into the way we manage data, which is crucial to our wider work.”

NATHAN MARSH, DIGITAL INNOVATION LEAD AT THE INSOLVENCY SERVICE

ABOUT US

We are Aiimi.

Transform how your people work with data, through Aiimi's software platform, data and digital products, and consulting services.

Our software platform automatically classifies, labels, relocates, and protects your data, opening up access where it's safe and locking it down where it's not, mitigating risk and fixing data quality. Unlike traditional governance tools, Aiimi's platform continuously maps and monitors your data estate for always-on compliance and risk management – and readies your data for safe, scalable AI adoption.

Our consultants bring deep domain expertise in AI, data, and digital transformation – delivered exactly where, when, and how you need it. Whether you want a specialist project squad or ongoing managed services, our people work seamlessly as part of your team, driven by your objectives and committed to your outcomes. We experiment, iterate, and focus on what matters most, to accelerate time to value.

OUR SOFTWARE

Aiimi's platform interconnects valuable information across all enterprise systems for a comprehensive understanding of your data universe and acts as an accelerant to our services.
