OPERATIONALISE AI

Operationalise AI.

aiimi

OPERATIONALISE AI

Product Description.

The promise of AI is only as strong as the data that fuels it, but most enterprise data is fragmented, inconsistently governed, and unstructured. Organisations face a critical challenge: unlocking the value of information and scaling AI adoption while maintaining trust, compliance, and security.

Aiimi enables organisations to operationalise AI at scale to deliver measurable value – accelerating business outcomes and ensuring AI initiatives are built on trust.

Aiimi's platform connects your chosen LLM(s) to all of your corporate information sources. It enables you to deploy retrieval augmented generation solutions and take advantage of your organisation's complete data picture. The solution provides a built in UI for chatbots and deep research flows, as well as providing integrations to enhance existing AI assistants.

OPERATIONALISE AI

Features & Benefits.

Our products are designed to deliver maximum benefit with a flexible approach – here's what you can expect.

PRODUCT FEATURES

- Suite of connectors for indexing multiple corporate data sources
- Central searchable index of corporate structured and unstructured data
- Structured data ingestion and preparation for use with LLMs
- MCP Service Support for integrating with ecosystem copilots
- Chatbot and AI Assistant
- Classification engine so AI only uses golden records
- Extensive support for citation and on-demand deep research
- Integrations with MS Copilot, Claude Desktop, and Databricks Genie

PRODUCT BENEFITS

- Rapid deployment of custom LLM-powered chat experiences
- Secure use of corporate data in LLM solutions
- Classification of data and reduction in hallucination
- More complete answers from AI solutions with full corporate data
- Multi-LLM support (OpenAI, Llama, Claude Sonnet, Mistral, and more)
- Orchestrate the feed of curated data to your chosen front end
- Enable rapid experimentation against select datasets
- Automatically assess information risk and exclude sensitive data from LLMs
- Automated search for cited information within the source document preview(s)

“

The simple ‘job’ our customers need to get done is to make their tangled mess of data trustworthy and ready for AI.

They are struggling to make progress and need a partner who thrives in this complexity to solve the entire problem, not just parts of it.

That's what Aimi does.

STEVE SALVIN
AIIMI FOUNDER & CEO

AI Data Governance.

Automatically govern data in situ and at scale, to ensure compliance, minimise risk, improve decision-making, and ready your organisation for AI. Always-on data management keeps pace with evolving regulations and business needs, while maintaining full visibility and control over your data.

01

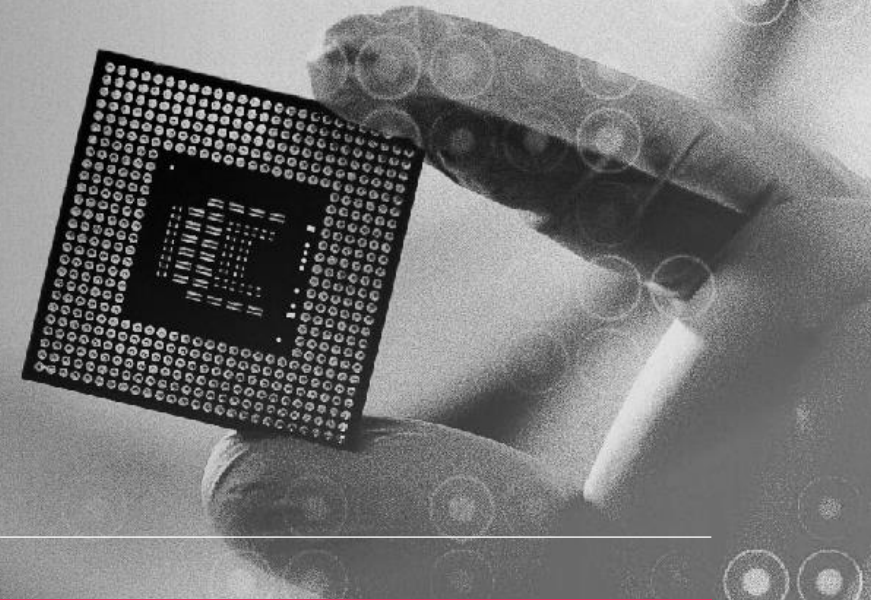

Use Agentic AI workflows to find and fix data quality.

02

Fuel decisions and AI with trusted, gold-standard data.

03

Classify, cluster, and visualise data with AI.

Enterprise AI Search.

Connect to timely insights for faster, smarter decision-making, with enterprise search powered by AI. Retrieve and generate the most relevant, accurate results with natural language and semantic search. Get transparent, traceable AI outputs that respect all source permissions, with full explainability and citation.

01

Search across all data and content sources.

02

Filter and refine results by classification.

03

Extend reach of co-pilots.

04

Graph visualisation of results.

AI Chat & Assistant.

Get instant, expert insight through a secure and intuitive chat experience, drawn directly from your trusted data and powered by RAG. Specialist knowledge is no longer siloed, with instant access to verified expert answers.

01

Empower your people to find the right answer faster.

02

Get trusted expert answers with citations and sources.

03

Integrate with external LLMs using MCP.

Enterprise Integration.

Aiimi's platform is built to integrate into your organisation. It works seamlessly with Microsoft, Google, and all LLM providers. It provides a rich API along with data science API, OData API, and an MCP Server. Customers can benefit from the apps provided by the platform and also use the platform in headless mode, consuming the virtual data layer from third-party integrations and other Agentic platforms.

DATA SCIENCE API

Gives Data Scientists programmatic access to data and searches, to aid in the development of analytical models.

O DATA API

Connect to Business Intelligence tools such as Power BI and Tableau.

INSIGHT API

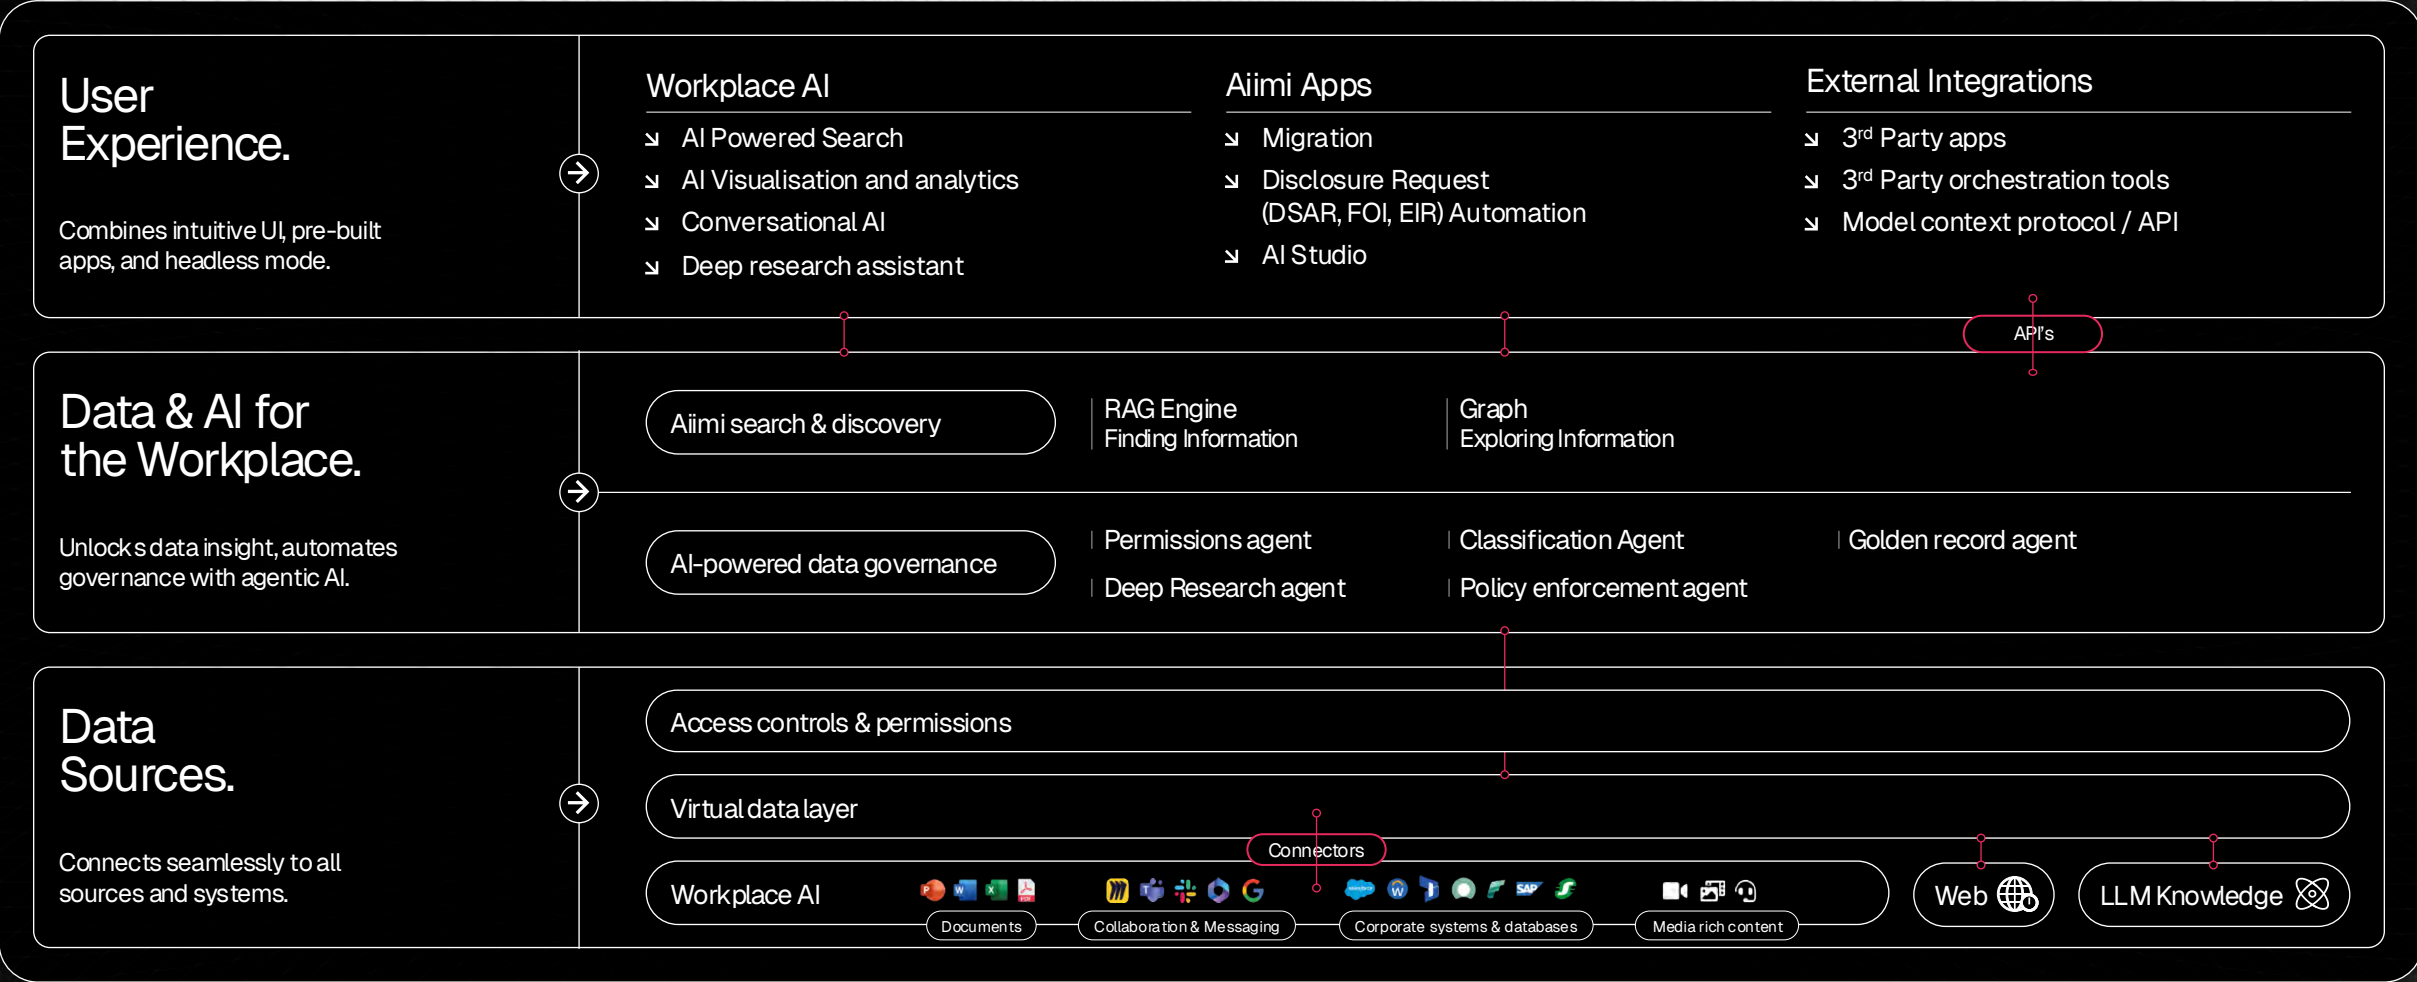

Build connectors to any unstructured data source, such as ECM systems document management systems, or file systems.

MODEL CONTEXT PROTOCOL (MCP)

MCP provides a standardised way to connect AI applications to external systems.

Architecture Overview.

Aiimi's software platform connects to all sources and systems. AI-powered classification, compliance, and control enable automated data governance at scale, carried out by intelligent AI agents.

CASE STUDY

AI PLATFORM

KPMG teams up with Aiimi to roll out AI platform.

“

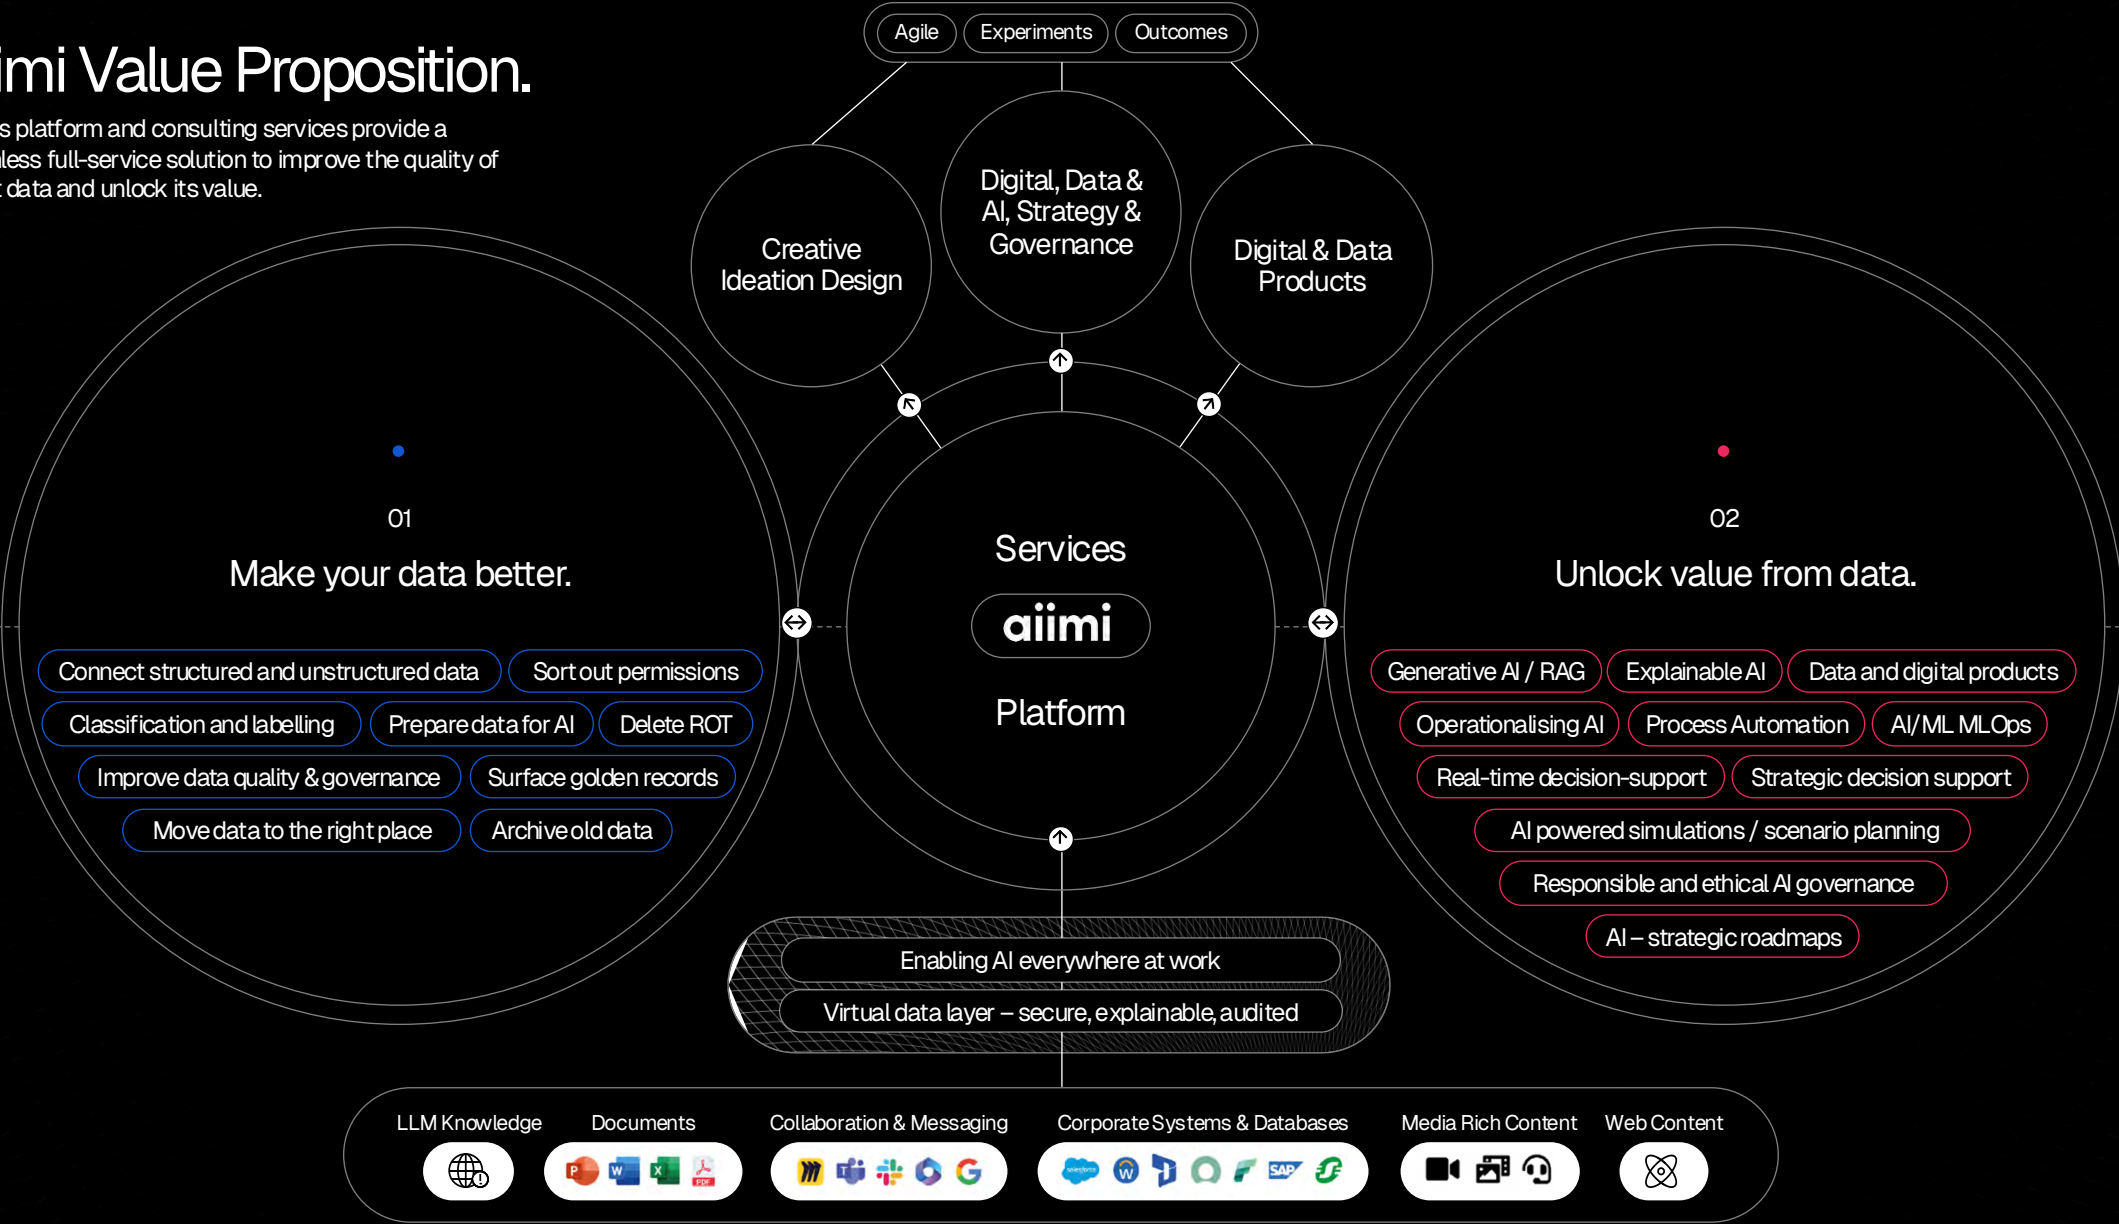

To have trust in AI outputs you must first have trust in your underlying data. The Aiimi platform gives us that trust.

CHRIS ALLEN, CHIEF DATA OFFICER AT KPMG UK

Aiimi Value Proposition.

Aiimi's platform and consulting services provide a seamless full-service solution to improve the quality of client data and unlock its value.

HOW WE DO IT

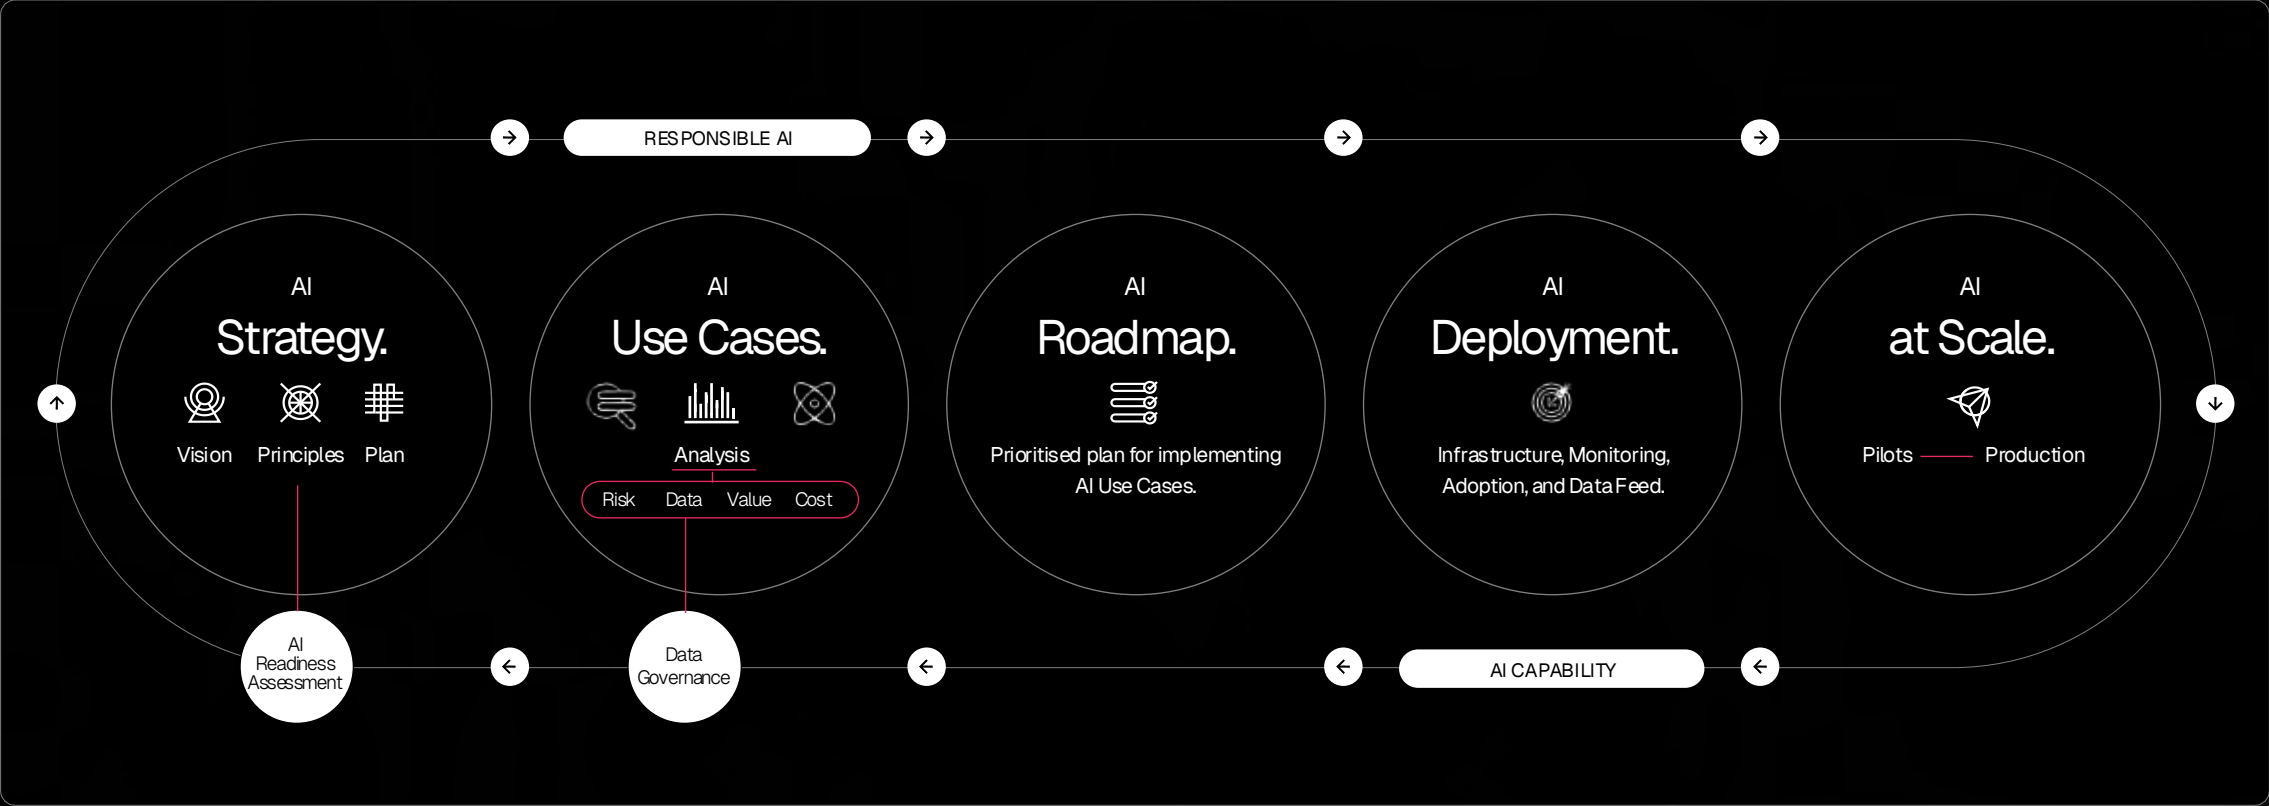

Our AI Playbook.

Our AI Playbook is the blueprint we use to help organisations unlock the full potential of AI. It captures our proven approach to discovery, delivery, governance, and adoption, ensuring AI rolls out smoothly and creates real business benefit.

Aiimi AI Service Model

We've developed a structured yet flexible approach to AI adoption. Wherever you are in your AI journey, this framework helps make sense of where AI can deliver value and what's needed to move from ideas to outcomes. It's not a rigid, sequential programme; some organisations need help shaping their AI strategy, others want support scaling what's already working. Wherever the starting point, the goal is the same: to make AI useful, usable, and impactful across the business.

ABOUT US

We are Aiimi.

Transform how your people work with data and AI, through Aiimi's software, data and digital products, and consulting services.

Our software platform automatically classifies, labels, relocates, and protects your data, opening up access where it's safe and locking it down where it's not, mitigating risk and fixing data quality. Unlike traditional governance tools, Aiimi's platform continuously maps and monitors your data estate for always-on compliance and risk management – and readies your data for safe, scalable AI adoption.

Our consultants bring deep domain expertise in AI, data, and digital transformation – delivered exactly where, when, and how you need it. Whether you want a specialist project squad or ongoing managed services, our people work seamlessly as part of your team, driven by your objectives and committed to your outcomes. We experiment, iterate, and focus on what matters most, to accelerate time to value.

IMPLEMENTATION

Implementation services are charged at our SFIA rate card rates. Effort is dependent upon the metadata enrichment processes required to fulfil your requirements and the cloud and on-premises infrastructure requirements. Contact us to discuss your requirements.

PRODUCT	DESCRIPTION	UNIT	PRICE
Aiimi Software Platform	Platform pricing is based upon the number of nodes that you require, which in turn is based upon the amount of content you are indexing (per 25TB of source content) and the disaster recovery mechanism you employ. Hot standby DR involves additional nodes, VM replication usually does not.	£30,000	Per node per Annum
AI Companion	Integration with the Large Language Model(s) of your choice, offering options for both on-premises, on-infrastructure and AI as a Service, for example Llama, Granite, OpenAI and Falcon. Also included are Retrieval Augmented Generation workflows and Extractive AI.	£30,000	Per Annum

Managed Services & Support Pricing.

PRICING	MANAGED SERVICES			ADDITIONAL SERVICES	
	Platform Support	Platform Innovation	Platform Optimisation	Platform Experts	Platform Community
	Technical Support Services	Release Upgrades & Deployments	Proactive Performance Monitoring & Reporting	Advisory & Auditing Services	Knowledge Sharing & Expertise
Additional 20%	✓ Provision 2nd-line support ✓ Service desk provision ✓ Regular maintenance windows ✓ Emergency patch deployments for platform ✓ Incident monitoring and reporting ✓ Customer SLA reporting ✓ Customer satisfaction surveys ✓ Access to Online Service Desk Portal ✓ Incident trend analysis ✓ Customer satisfaction measurement and reporting	✓ Deployment of quarterly product releases to customer environments (potentially on auto upgrade basis) ✓ Elastic version upgrades (in-line with software dependencies) ✓ Provision of release notes and access to the Knowledge Centre ✓ Change Control process support ✓ Regression testing programme ✓ Proactive capture of end user feedback oriented to product improvements	✓ Provision of 3rd-line support ✓ KPI and analytics monitoring and reporting ✓ Enrichment performance monitoring and reporting ✓ Proactive application monitoring (we spot the issue before the customer does) ✓ Server-level monitoring ✓ Customer environment performance testing and baselining (if applicable) ✓ Performance optimisation review & recommendations package	✓ New feature demos and tutorials ✓ Annual Information Visibility Audit ✓ Annual Cloud Adoption Audit ✓ Annual Privacy Audit ✓ Proactively engage customers to identify and advise on new opportunities ✓ Service delivery business benefits review	✓ Access to a community with key customers and affiliated partners ✓ Platform for sharing customer testimonials, case studies, referenceable materials ✓ Knowledge Centre access (i.e., guidance materials) ✓ Introduction to technology sessions (NER, OCR etc.) ✓ Roundtables and events
