DISCLOSURE

Disclosure Solution for DSAR, FOI, EIR.

aiimi

DISCLOSURE SOLUTION

Product Description.

As the volume and complexity of disclosure requests escalates, you need tools that can manage and expedite the entire process – from instant data discovery to automated redaction.

Aiimi's unique discovery platform works alongside you, using AI to identify personal data across corporate information sources. It provides automated collection, redaction, and disclosure for all kinds of requests including DSAR, FOI, and EIR, along with compliance auditing and remediation of non-compliant data. Regulatory deadlines are met with ease – and compliance, HR, and IT teams are freed up for more strategic work.

Stay one step ahead and be better able to deliver your privacy and compliance goals, with always-on data governance and alerts, prioritisation of risk, and automated compliance.

DISCLOSURE SOLUTION

Features & Benefits.

Our products are designed to deliver maximum benefit with a flexible approach – here's what you can expect.

PRODUCT FEATURES

- Enterprise Search and discovery for data to support disclosures
- End-to-end workflow management with timers and extension management
- Automated and manual redaction, with automatic sensitive data detection
- Disclosure portal to support secure subject communication and information release
- Structured and unstructured data discovery and release
- Connectivity to search corporate data systems from a central dashboard
- Defensible secure information handling and disclosure

PRODUCT BENEFITS

- Reduce time to receive, process, redact, and release
- Automatically convert a single disclosable row from spreadsheets to PDF
- Automated redaction of sensitive information across thousands of documents
- Roles-based access control model to centralise discovery
- Fully managed service available
- Implement in your cloud or ours (AWS, GCP or Azure)
- Full audit trail from request to disclosure

DISCLOSURE SOLUTION

How it works.

ONE

Full visibility.

TWO

Multi-dimensional risk profiling.

THREE

Advanced pattern-matching & alerts.

FOUR

Sensitive data discovery.

FIVE

Always-on compliance.

SIX

Take remedial action.

SEVEN

Redaction tools for automated disclosure.

Trust always-on auditing

1 / 3

Discover, audit, and protect sensitive and personal data that exists in your information assets, including PII, PCI, and Intellectual Property.

Manage data risk.

2 / 3

Delivers actionable insights, anticipating and alerting you to data risks, giving you the tools to take mitigating action.

Automate compliance processes

3 / 3

Always-on monitoring powers fast, accurate, automated compliance processes, including for SARs, FOI, and EIR.

Platform Overview.

01 | DISCOVERY

Our software platform automatically crawls all repositories, whether they're in the Cloud or on-premises. This captures an up-to-date centralised index of everything that exists in any organisation, including its filename, metadata, where it's stored, and who can access it.

02 | ENRICHMENT

With no user involvement needed, the platform enriches information with additional context and structure, using machine learning techniques like classification, text extraction, geotagging, and named entity recognition. Our enrichment agents perform processes including: Optical Character Recognition (OCR), Natural Language Processing (NLP), Geotagging, Image Recognition, Speech-to-text, and Named Entity Recognition (NER).

03 | REPOSITORY

The repository layer stores the enriched information index, along with security information and other configuration data. It can house tens of billions of pieces of information yet gives users blisteringly-fast response times.

04 | GATEWAY

All information is secured with an authentication gateway which respects access permissions from source systems and integrates with any corporate security protocols, like multi-factor authentication and single sign-on.

DISCLOSURE SOLUTION

Control, govern, and protect data.

ONE

Achieve privacy by design.

TWO

Unlock the hidden value in information.

THREE

Control and manage all information across the enterprise.

CASE STUDY | HOLLAND & BARRETT

DSAR Automation for Holland & Barrett.

Holland & Barrett

“

I don't know where we'd be without the Aiimi platform - it's been a lifesaver. We've gone from taking a week to set up a DSAR to being able to start running a request in just a few minutes. The difference it's made to our delivery timeline is incredible. It was taking us up to three months to process and deliver more complex Disclosure Requests and sometimes it necessitated use of the ICO's permitted deadline extension. Now we can get DSARs out the door in a week without worry. And, crucially, we're pulling data we can trust and which enables a data subject to receive their data more quickly!”

Hollie Mela

Data Protection Officer at Holland & Barrett

ABOUT US

We are Aiimi.

Transform how your people work with data, through Aiimi's software, data and digital products, and consulting services.

Our software platform automatically classifies, labels, relocates, and protects your data, opening up access where it's safe and locking it down where it's not, mitigating risk and fixing data quality. Unlike traditional governance tools, Aiimi's platform continuously maps and monitors your data estate for always-on compliance and risk management – and readies your data for safe, scalable AI adoption.

Our consultants bring deep domain expertise in AI, data, and digital transformation – delivered exactly where, when, and how you need it. Whether you want a specialist project squad or ongoing managed services, our people work seamlessly as part of your team, driven by your objectives and committed to your outcomes. We experiment, iterate, and focus on what matters most, to accelerate time to value.

WE ARE AIIMI | OUR SOFTWARE & SERVICES

OUR SOFTWARE

Aiimi Workplace AI interconnects valuable information across all enterprise systems for a comprehensive understanding of your data universe and acts as an accelerant to our services.

OUR SERVICES

Our Services team puts data at the heart of your digital service transformation, utilising our Workplace AI platform and sector expertise to deliver insight that drives positive outcomes for your business.

Software Pricing.

IMPLEMENTATION

Implementation services are charged at our SFIA rate card rates. Effort is dependent upon the metadata enrichment processes required to fulfil your requirements and the cloud and on-premises infrastructure requirements. Contact us to discuss your requirements.

PRODUCT	DESCRIPTION	UNIT	PRICE
Core Enterprise Search Node	A search node is used to index your information to support eDiscovery (and for SAR, personal data detection). A single node will support indexing 25TB of source information. Configurations of 3, 5 or more nodes are supported. In excess of 5 nodes, volume discounts will apply	£30,000	Per node per annum plus support
AI Powered Disclosure Add-On	Includes Personal Data and PCI Data detection algorithms, the internal and external Subject Access Request Portal and the Personal Data and PCI Data audit dashboards.	£30,000	Per annum plus Support
