PRICING GUIDELINE SECURE IT DATA SANITISATION & DESTRUCTION

PRICING GUIDELINE...

Greensafe can provide multiple service options for both End User Compute (EUC) and Enterprise IT hardware, from secure IT data collection, data wiping and destruction at our Midlands HQ, using our FSC services, or via customer site data destruction, to 11mm, 6mm or 2mm shred, dependent on security classification.

Onsite or Offsite hardware destruction services can include HDD's, RAM, HDD's, SSD's, Motherboards, Graphics Cards and any other components that can potentially hold customer data.

Greensafe have multiple trucks for data destruction, disassembly of hardware and components, collection vehicles and more, whatever your security requirements, we have a solution, engineer and vehicle to cover the service.

Our FSC facility guarantees that if you cannot provide the parking space required to deliver the service you need (typically SC cleared engineers and 6mm or 2mm shred, with multiple vehicles) at your offices/data-centre, then Greensafe can securely collect the IT kit and transport it back for processing. The FSC facility provides all of the security features required to destroy/shred and securely deal with all levels of IT security and is verified by the PASF.

We can now also provide incineration services throughout the UK.

Other destruction services volumes pricing - Shredding and Incineration

OTHER DESTRUCTION SERVICES VOLUME PRICING *(REF NOTE IS1 BELOW)	SHREDDING PRICING	INCINERATION PRICING
Microfilm / Fiche / Tapes - 6mm shred Full Day (up to 500 units)	£3,000.00	POA
Microfilm / Fiche / Tapes - 2mm shred Full Day (up to 500 units)	£7,250.00	POA

*IS1: - Greensafe offer secure incineration services, if required, however, we have certain constraints around how products are incinerated, based on device type, quantity and chemical composition. Therefore, when quoting for this service we would require the following; product, material type, quantities, weights, dimensions, along with specification sheets to determine the exact composition of materials. Dependent on location and security requirements, we may require two SC cleared drivers for overnight travel to the incineration plant.

Our prices for secure collection or dedicated collection, as well as processing are in the matrices below.

If you feel you would like to discuss the options around pricing and potential buy-back services, please contact the Account Director for GCloud15 – warren.playford@greensafeit.com or, the Senior BDMs - jason.seabrook@greensafeit.com and harry.gascoigne@greensafeit.com

Pricing matrix with 75% revenue guarantee

If your security protocols allow Greensafe to process and remarket the IT, once data wiping/destruction has taken place, we guarantee a 70% rebate of any remarketing will be returned to the customer.
