by IAM Experts LTD.

Unifying Data, Contextualizing Risk, Automating Compliance.

The Identity Data Gridlock

Today, many organisations rely on **platform-specific** or technically oriented reporting tools that provide **fragmented insights** and do not easily translate into **business-aligned metrics**.

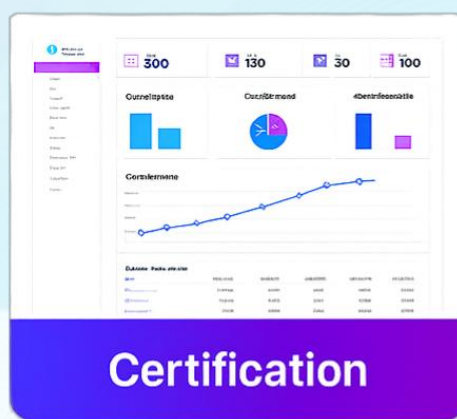

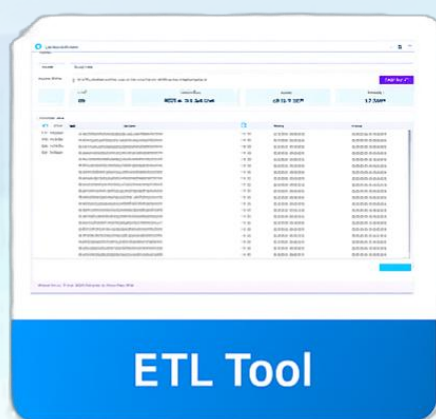

As a result, it is often a struggle to visualise the broader IAM posture, **contextualise risk**, or **articulate the impact** of remediation activities in a meaningful way.

With IAME's reporting suite, we can create a **consolidated, intuitive**, and **repeatable** reporting framework that helps stakeholders understand their identity risk profile, track improvements **over time**, and align actions with audit and compliance expectations.

This approach enables a shift from **tool-centric information** to **insight-driven** conversations grounded in **measurable outcomes**.

An Integrated Ecosystem for Identity Intelligence

We bridge the gap by **consolidating and enriching data** across the landscape, coupling it with rich easy to understand reporting.

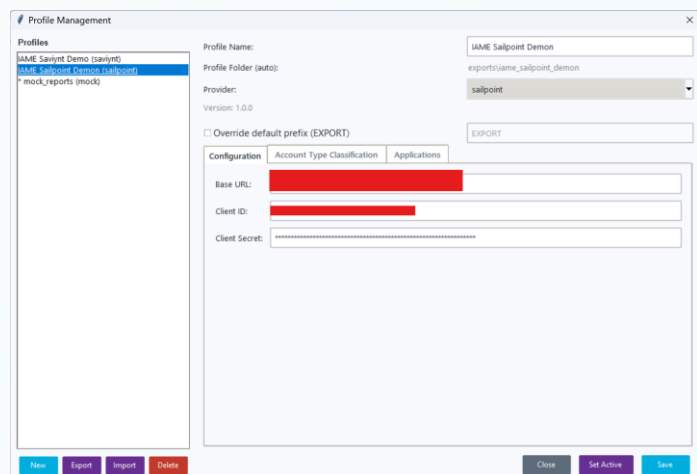

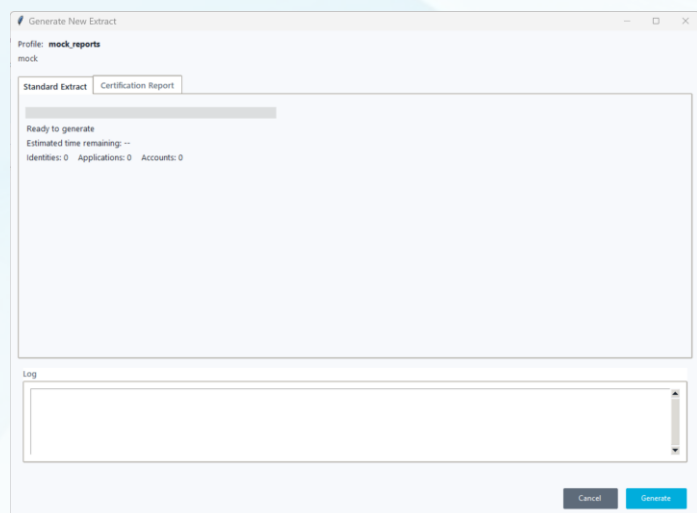

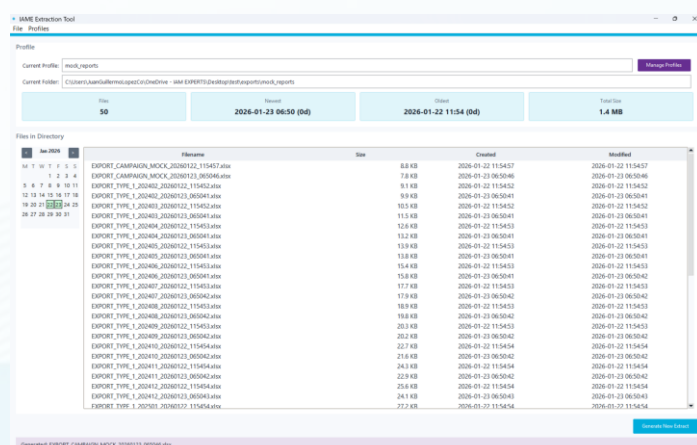

Our suite of tools comprise of 3 key tools for extraction and presentation.

The Engine: Extracting & Enriching Data

ETL Tool

IAME Extraction Tool

A secure, desktop application designed to *transform raw data into standardized, audit-ready intelligence*. Built on a flexible plugin architecture, it connects to the IGA tools automating the heavy lifting of harvesting, cleaning, and structuring your identity landscape, eliminating the risk and fatigue of manual spreadsheet work.

Beyond simple extraction, it applies *intelligent logic* to automatically *calculate* account dormancy, *classify* privileged and service accounts and *validate* manager status.

Supported Platforms

SailPoint – Identity Now

SailPoint – Identity Security Cloud

SailPoint _ IdentityIQ

Saviynt – EIC

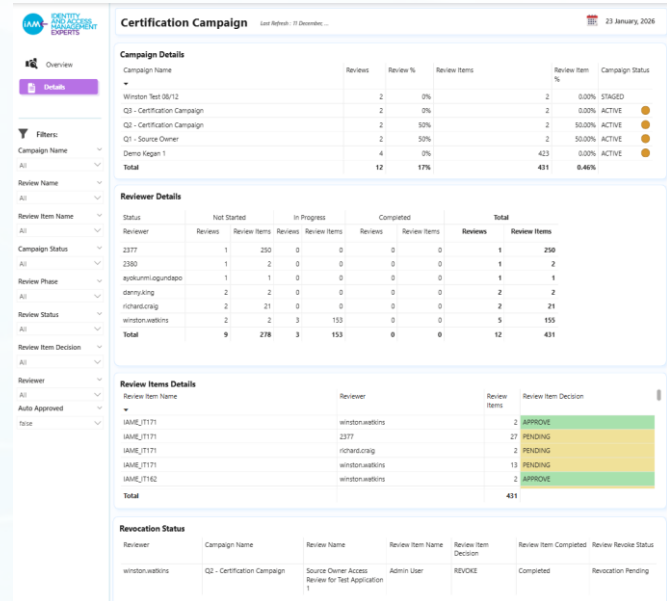

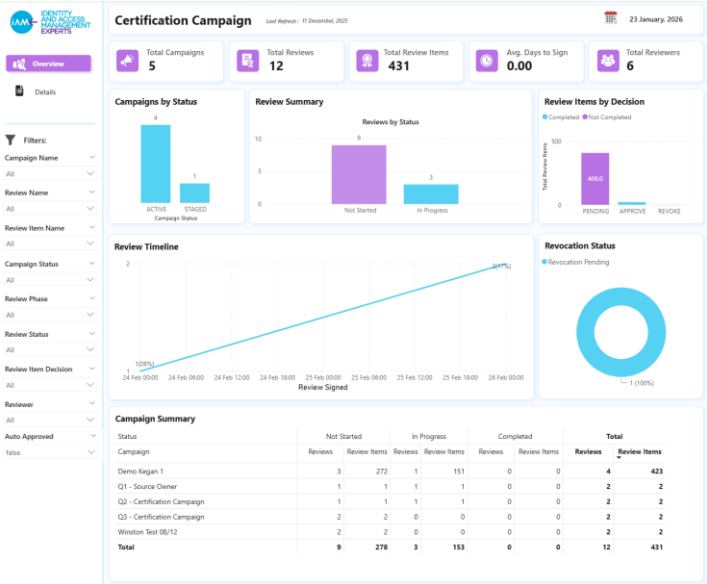

Entra ID (coming soon)

CyberArk (coming soon)

Campaign Command Center

Certification

Certification Operations Report

Purpose-built for the daily demands of access certification creation and monitoring, this Power BI solution **transforms** the chaotic **process of access review reporting** into a **streamlined, end-to-end operation**.

It provides operational teams with the **real-time visibility** needed to drive campaigns from initial scoping and analysis to final closure, **eliminating the need for manual data** scrubbing.

Near Realtime Status Tracking

Monitor progress across hundreds of reviewers to **identify bottlenecks**, track completion velocity, and intervene before they impact your audit timelines.

Performance Analytics

Go beyond the "approve/revoke" decision. Track the full lifecycle of access removal, verifying **revocation status** in target systems to ensure no access is inadvertently left active.

Pre & Post Analysis

Support your "Get Clean" initiatives with deep insights into campaign readiness before launch, and detailed remediation analysis after closure.

Executive Visibility & Trend Analysis

KPI

KPI & Strategy Report

Transform raw identity data into **executive-ready visualizations** that tell the true story of your IGA program's maturity. Designed for leadership, these Power BI dashboards provide the **high-level context** needed to support budget justifications and strategic investment decisions with defensible data. Instead of getting lost in the weeds, **gain a clear, high-level overview** of your landscape to:

Measure What Matters

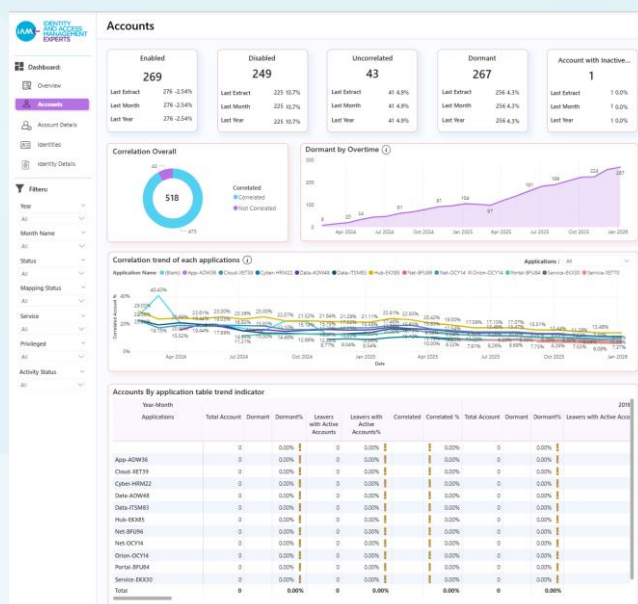

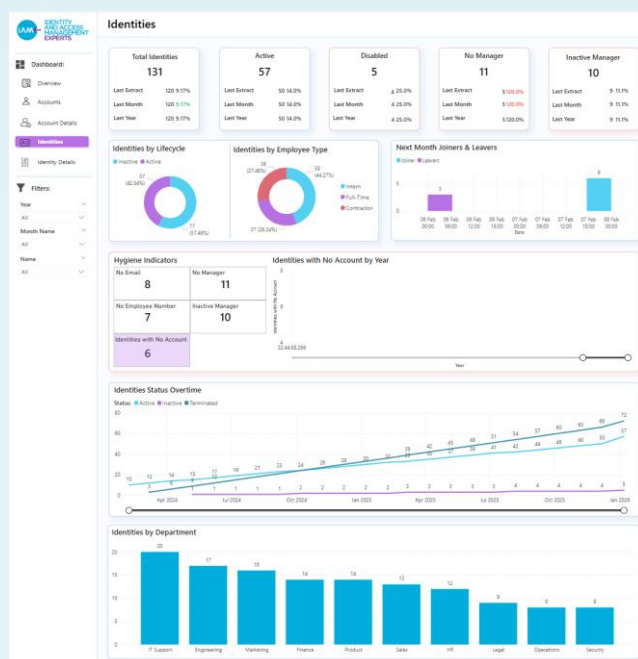

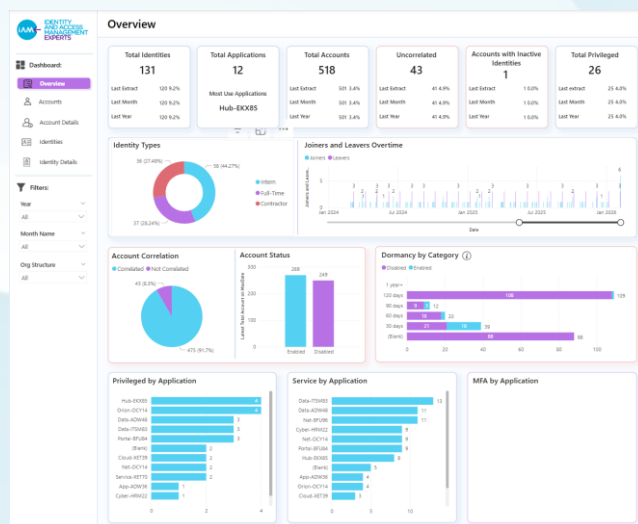

Comprehensive tracking of **Identity, Account, and Application** metrics

Get Clean, Stay Clean

Drive hygiene initiatives with continuous **monitoring of data quality** and **program health**.

Track Long-Term Trends

Shift from reactive reporting to **proactive governance** by monitoring performance and ROI over time.

Accelerating Your IGA Maturity

We are redefining the role of Identity Governance, shifting it from a reactive operational cost to a proactive driver of business resilience.

Our suite eliminates the friction between technical complexity and executive decision-making. By automating the mechanics of data, we liberate your security talent to focus on what truly counts: **mastering risk exposure and enforcing control.**

***We transcend operational data;
we deliver the foresight essential for protecting tomorrow.***
