Who are RT Consulting?

RT Consulting are a trusted SME management consultancy and specialist service provider.

We deliver highly capable and effective value for money solutions to our clients as the 'customer friend' and trusted partner across Defence, Policing, Central and Local Government.

We take a consultative approach to every challenge. We start by understanding your specific needs, before designing and implementing tailored solutions that deliver measurable results and lasting benefits.

Our team of highly skilled and experienced security vetted experts combines deep industry expertise with practical experience, ensuring that every recommendation is actionable and aligned with your strategic goals.

A Gold badge holder of the Armed Forces Covenant Employer Recognition Scheme, we are proud partners across the armed forces community, supporting those transitioning into civilian life, positioning ourselves as the SME of choice for service leavers.

Our people are what makes our business, bringing specialist expertise to every assignment. From challenging the status quo, to delivering insight and awareness of future risks and opportunities, we bring a collaborative and innovative approach to everything we do. We have the scope of experience and the access to consultant support that allows us to quickly pivot in a rapidly evolving market.

We believe in collaboration over competition and have built a strong and trusted network of other specialist consultancies, large and SME. This enables us to offer our customers access to a broader ecosystem of expertise, delivering end-to-end solutions and fostering collaboration across the supply chain.

Within this Service Catalogue you will learn about the services and capabilities we offer, how we offer them and our support to our customers and partners throughout delivery to set up for future success.

RT Consulting deliver services through a range of frameworks and accreditation systems. As a Crown Commercial Service Supplier on the Digital Marketplace, we offer solutions via DOS, G-Cloud, Dynamic and Low Value Purchase System agreements:

Crown
Commercial
Service
Supplier

The RT Society is our hand-picked high-quality community of consultants and skilled professionals, forming an integral part of how we deliver value to our clients.

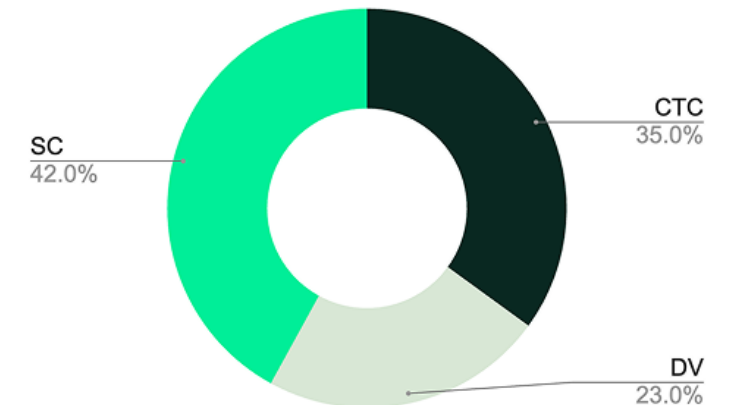

Alongside our core team of permanent consultants, we also maintain a vast network of experienced individuals across Defence, Government, and Policing sectors, bringing together deep subject matter expertise with a shared commitment to quality, collaboration, and continuous improvement.

This network allows us to flex and scale quickly to support our core team, drawing on trusted professionals with the right experience and clearances to meet complex client needs. Through the RT Society, we promote knowledge sharing, peer support, and mentorship, while providing access to exclusive development opportunities and a shared sense of purpose. The result is a highly capable, adaptable, and engaged consultancy community, one that enhances our delivery and ensures clients benefit from insight, innovation, and sector-leading talent.

Our Security Cleared Community

“I want to emphasise the commitment RT has shown to service leavers and veterans. They’ve recognised many of the challenges this cohort faces when leaving military service and have developed a pathway that supports a smooth transition into a new career. It was a refreshing experience for me personally, and that sentiment has been echoed by several others I’ve introduced to the company.”

JP Crichton
RT Consultant

RT Consulting is committed to providing a quality service in a manner that ensures the actual or potential impact on the environment is minimised whenever possible. Compliant with all relevant environmental legislation we deliver our projects with the following in mind:

Integrating the consideration of environmental concerns and impacts into all our decision making and activities

Promoting environmental awareness among our employees and encouraging them to work in an environmentally responsible manner

Educating and informing employees about environmental issues that may affect their work

RT are a Member organisation of the Government Digital Sustainability Alliance, bringing government, industry and academia together to improve digital sustainability outcomes for the UK government and its supply chain.

“In recent years, the United Kingdom has positioned itself as a frontrunner in addressing climate change, recognising the critical importance of sustainability and the pursuit of net zero emissions. This commitment is not merely an environmental obligation, but a multifaceted strategy aimed at fostering economic growth, enhancing energy security, and improving public health.

Transitioning to a net zero economy also presents substantial economic opportunities. The Confederation of British Industry (CBI) reported that the UK's net zero sector grew by 10% in 2024, outpacing the broader economy. This growth contributed £83 billion in GVA and supported nearly a million jobs with wages significantly higher than the national average. This expansion not only drives economic prosperity but also positions the UK as a leader in the burgeoning global green market.

RT Consulting have committed to meeting a Net Zero emissions target by 2030, to be achieved through responsible sustainability behaviours, initiatives, and partnerships. We encourage our supply chain to be equally committed to carbon reduction practices.”

Sue Stokes
Managing Director

RT Consulting are continuously striving to positively support social value initiatives across our respective communities. Supporting UK Armed Forces, Service Leavers and Veterans is something we are incredibly proud of, having been formally recognised as an ERS Armed Forces Covenant Gold Award holder.

We support a multiple partnerships and initiatives supporting UK veterans, including SSAFA, CTP, FEC and White Ensign, where we provide military transition support, Industry awareness and employment opportunities.

As part of our commitment to sustainability we work with Carma Earth, a Veteran Owned climate action SME supporting UK veterans. Our investment not only helps restore our planets environment but also supports UK veterans and other vulnerable groups through their charity partnerships.

“From the outset it was clear that RT Consulting valued the experience that members of the veteran community hold and how this experience can translate across to achieving success on many of the projects and programmes where RT places its consultants. The on boarding process was extremely smooth and again was very understanding of the challenges faced by service leavers when transitioning out of the Military.”

Consultant, UK Defence Programme

Our commitment to Service Leavers:

Armed Forces Reservists

RT Consulting has a very supportive policy for Armed Forces Reservists, recognising that they bring excellent transferable skills to business, including resilience, determination and excellent teamwork and leadership skills.

Guaranteed Interview Scheme

Where a lot of our work involves projects in the defence industry, RT Consulting provide guaranteed interviews for Service Leavers and Veterans, enabling us to leverage their skills and understanding to add value to the work that we do as an organisation.

RT Society & Knowledge Sharing

Our consultant team operate as a supportive society (the RT Society), ensuring knowledge transfer and information sharing. Where our consultant team may be geographically dispersed, our RT Society ensures that each consultant, permanent or associate, feels they are part of one team working for best effect.

Proud to support climate projects

Asset Management

Today's world is constantly evolving, meaning organisations need to be able to achieve project success in a timely manner. Our P3M services are designed to provide you with clarity, control and confidence, enabling our clients to be adaptable to the ever-evolving landscape and make more informed decisions.

Our experienced consultants use globally recognised and accredited frameworks – Prince2, Agile, Hybrid, Waterfall, MSP – tailored to fit your environment. We provide capability that lasts by not just delivering projects, but also uplifting and upskilling your people, processes and project maturity for success that lasts.

Key Services:

End-to-End Project Delivery

From Concept to Implementation through to Live Service, we can parachute in at any project stage. You can expect high-standard delivery from planning to realisation – managed with transparency and focused on collaboration.

PMO Design and Mobilisation

We can build PMO frameworks from small to large scale or refine what's already in place building your confidence in control, consistency and visibility.

Business Case

Well versed in the HMG Green Book 5 business case models we can provide support to achieve Outline Business Case, Strategic Business Case and Full Business Case.

Stakeholder Management

Through structured engagement and communication strategies, we bring your people along for the journey, providing support and clarity to keep project success on track while providing space to collaborate.

Project Controls

We apply robust project controls to manage scope, schedule, budget, and risk, supporting transparent planning, cost control, and reporting throughout the project lifecycle.

Case Study

Counter Terrorism
Policing HQ

Duration

5 years

Scope

National Portfolio Management Office across 43 Police Forces, Home Office, and Security Services

Challenge

Counter Terrorism Policing HQ required strategic delivery support across a complex portfolio of national projects. These spanned intelligence, ICT, compliance, and transformation, with a focus on raising P3M maturity, modernising operating models, and coordinating delivery across the Counter Terrorism Network—including the Met Police, MI5, the Home Office, and all 43 police forces.

Action

RT Consulting provided experienced consultants from policing, military, civil service, and industry backgrounds to lead delivery across key strategic pillars. We established a Portfolio Management Office (PMO) to provide consistent control across 24 projects and programmes, offering expert guidance in PPM, leadership, and design support.

Result: Formal Commendation For Results Achieved

Our delivery created a national baseline of capability and cost, enabling more effective, efficient, and sustainable operations. By bringing the re-scoped programme within performance, time, and cost targets, we restored sponsor confidence and received formal commendation from the Metropolitan Police Service.

Successfully delivering change and realising benefits requires more than just process, it demands engagement, clarity, and the ability to sustainably embed new ways of working.

At RT Consulting, we focus on building internal capability through effective knowledge transfer, ensuring change is not only implemented but understood, adopted, and owned. Our consultants work alongside your teams to co-create practical change strategies, empower leaders, and enable long-term transformation without ongoing external reliance.

Key Services:

Change Strategy & Planning

We develop tailored change strategies aligned to business objectives, with clear plans for communication, adoption, and benefit realisation.

Stakeholder Engagement

Understanding the people aspect of change is vital to its success. Our engagement is built on trust, collaborating with you from the outset and throughout the journey using a range of tools and techniques.

Training & Upskilling

We work with your teams to identify training and upskilling needs and opportunities – providing tailored training and on-the-job upskilling to enable your teams to sustain change beyond our involvement.

Knowledge Transfer

Knowledge transfer isn't just an afterthought, our approach is to co-create solutions and ensure you receive all Intellectual Property, tools and the skills needed to embed and sustain change.

Case Study

Network Rail

Duration

Fixed term

Scope

Business Case Development for National Digital Upgrade

Challenge

Network Rail required expert support to develop a robust business case for Digital Railway funding from the Ministry of Transport. The objective was to secure investment for upgrading digital systems and aligning rail capabilities with international standards. Without a compelling, evidence-led proposal, the funding request risked rejection.

Action

RT Consulting provided experienced consultants from policing, military, civil service, and industry backgrounds to lead delivery across key strategic pillars. We established a Portfolio Management Office (PMO) to provide consistent control across 24 projects and programmes, offering expert guidance in PPM, leadership, and design support.

Result: £350m secured

The comprehensive business case enabled Network Rail to secure £350M in funding from the Ministry of Transport, allowing the national digital upgrade programme to proceed on schedule and with a clear mandate.

In an increasingly complex threat landscape, organisations must ensure that information is secure, compliant, and resilient.

RT Consulting provides expert support across cyber security strategy, information assurance, and accreditation, helping you safeguard data, meet regulatory requirements, and build trust with stakeholders. Our consultants bring a clear, practical approach, aligning frameworks and controls with your operational priorities while supporting your teams to build internal assurance capability.

Key Services:

Cyber Security Strategy

From risk assessment to policies and procedures, security awareness and compliance, we can develop strategies aligned to Government Cyber Security Strategy to support organisational resilience.

Information Assurance

We deliver structured assurance planning, risk assessment, and implement control to ensure data is managed securely and responsibly.

Accreditations, Governance & Frameworks

Protecting valuable data, systems and intellectual property from cyber threats is vital to every organisation. Utilising our experience and knowledge of accreditation processes and frameworks such as NIST, ISO standards, CIS controls and Cyber Essentials we help organisations achieve certifications while developing robust governance that align with regulatory requirements and strengthen your overall cyber resilience.

4 years

Scope

Cyber Security & Protective Monitoring for Counter Terrorism National Hosting Platform

Challenge

RT Consulting delivered specialist cyber security expertise to support two critical protective monitoring programmes: the National Official Hosting Platform (NOHP) and the Cyber Security Operations Centre (CSOC).

Action

Our consultants led on security architecture reviews, risk assessments and governance, ensuring both platforms met accreditation requirements and aligned with the NIST Cyber Security Framework and CIS controls. We worked closely with internal teams and suppliers to manage system integration, perform IT health checks, and define secure monitoring processes.

Result: Supporting over 300 Projects

These programmes now support enhanced threat detection, response, and resilience—underpinning over 300 secure projects across the national counter-terrorism network. The successful integration of our team led to further appointments within the department, reinforcing CTP's capability to manage cyber risks and deliver secure, accredited systems at scale.

As the Customer landscape increasingly moves away from local storage and on prem solutions, there is a much greater need for secure cloud technology, migration and development services.

RT Consulting provide resources and secure capabilities in DevSecOps (Development, Security, Operations) in support of each stage of the software development lifecycle (SDLC) through collaboration, automation, and shared responsibility. This includes ensuring security is early in the process to identify and fix vulnerabilities quickly.

Key Services:

Our development, security, and operations teams work together, embedding security testing and checks directly into automated CI/CD pipelines to deliver secure software at speed.

Key services and practices:

Threat Modelling and Planning: Integrating security requirements and performing threat modelling during the initial planning and design phases to proactively identify and mitigate potential risks.

Secure Coding and Code Analysis: Training developers in secure coding practices and using automated tools within their Integrated Development Environments (IDEs) to detect and fix vulnerabilities as they write code.

Container Security: Scanning container images for vulnerabilities, enforcing minimal base images, and implementing runtime protection for containerized applications.

Identity and Access Management (IAM): Implementing robust authentication, authorization, and Role-Based Access Controls (RBAC) to ensure only authorised users and services access sensitive systems.

Continuous Monitoring and Alerting: Using tools like Security Information and Event Management (SIEM) systems to continuously monitor application performance and security events in production, providing real-time analytics and alerts for anomalies.

Cloud Hosting Environment
DSTL

Duration

2 years

Scope

DevSecOps. Cloud Migration. Security Architecture. PMO

Challenge

Dstl was seeking to significantly enhance its exploitation of commercial cloud capabilities to exploit and leverage existing and emerging cloud technologies to the benefit of its Science and Technology (S&T) business users.

RT Consulting, working in close consortium partnership provided specialist support to a complex cloud migration and transformation programme, supporting the Defence Science and Technology Laboratories migrate from legacy 'On-Prem' data storage, management and information exchange, to modern Cloud Technology,

Action

To deliver the overarching operating model, architecture and service designs, elaborate the required work packages, evaluate the optimum delivery vehicles for these, and initiate and oversee the projects required to fulfil the programme objectives.

Our consultants supported across the full Change Management and DevSecOps lifecycle ensuring technology implementation and Information Assurance integrity. New Cloud Technology services aligned with the principles of Secure By Design

Result:

Year one progress has seen the establishment of the E2E Programme and DevSecOps workflows leading to successful year two migration and ongoing support.

Organisations are facing increasing pressures to drive value for money, manage risk, and ensure that procurement strategies are agile, fair, and aligned with strategic objectives.

At RT Consulting, we provide flexible commercial and procurement support by embedding seamlessly within your teams, combining deep domain expertise with a collaborative, client-centric approach. Whether you require end-to-end procurement services, value for money assessments, commercial strategy development, or support navigating complex governance, we help you build capability, assure compliance, and deliver results that stand up to scrutiny.

Key Services:

Commercial Strategy

We design pragmatic commercial strategies aligned with organisational objectives, policy requirements, and market dynamics.

End-to-end Procurement

From requirements definition to contract award, we manage the full procurement lifecycle to deliver compliant, timely, and value-driven outcomes.

Supplier Management

By developing strong supplier relationships, streamlining supply chains and implementing strong quality measures we can work with your teams to drive cost and operational efficiency.

Category Efficiency

We analyse spend and demand to identify opportunities for rationalisation, cost savings, and improved category management practices.

Case Study

Defence, Equipment & Support,
Ministry of Defence

Duration

3 years+

Scope

Commercial Analysis and Cost Assurance of a High-Value In-Service DE&S Support Contract

Challenge

The DE&S Delivery Team required independent assurance that a £200M contract with a Prime Contractor offered genuine value for money. Lacking in-house expertise to validate cost assumptions, they sought specialist support.

Action

RT Consulting deployed specialist expertise with deep engineering, logistics, and commercial knowledge to analyse the contract's cost structure. We conducted a detailed investigation into the pricing assumptions and service delivery, uncovering inconsistencies and identifying areas of potential overcharging.

Result: £10m impact

The analysis revealed up to £10M in potential overspend, prompting formal commercial negotiations with the Prime Contractor. RT Consulting's structured approach has been recognised as a valuable learning tool and is now being applied by the Delivery Team to inform negotiations on a higher-value follow-on contract.

Ensuring robust health and safety practices is fundamental to operational resilience, workforce wellbeing, and regulatory compliance.

RT Consulting supports organisations in assessing current practices, identifying areas of risk, and developing pragmatic strategies that embed a culture of safety. We work collaboratively with your teams to align health and safety approaches with strategic goals, delivering not just compliance, but continuous improvement and confident leadership in safety management.

Key Services:

Risk Assessments & Gap Analysis

We evaluate current policies, procedures, and workplace conditions to identify risks and challenges to inform decision making.

Health & Safety Strategy Development

Our deep expertise and knowledge of Health and Safety enables our consultants to provide advice and guidance for building a strategy to ensure a safe working environment in line with UK regulations such as Health and Safety at Work Act 1974, COSHH and NEBOSH.

Policy & Procedure Review

We support the development and refinement of policies to ensure they reflect best practice and statutory obligations.

Culture & Behavioural Change

Culture & behaviour change is a critical component of Health & Safety, we bring your teams along for the journey, making health & safety compliance realistically achievable within their daily roles, promoting positive behaviours and leadership at all levels.

Case Study

Crown Prosecution Service

Duration
1 month

Scope
Security & Risk Review of CPS Victim Meeting Rooms as part of the Victim Transformation Programme

Challenge

RT Consulting was engaged to support the development of national Minimum Standards for Victims Meeting Rooms (VMRs) across all Crown Prosecution Service (CPS) regions. The project supported closer alignment between Security and Health & Safety functions, helping to clarify risk ownership and enhance the shared approach to duty of care.

Action

RT Consulting deployed specialist expertise with deep engineering, logistics, and commercial knowledge to analyse the contract's cost structure. We conducted a detailed investigation into the pricing assumptions and service delivery, uncovering inconsistencies and identifying areas of potential overcharging.

Result: Improved Collaboration & Accountability

We conducted a full documentation review, gap analysis of risk assessments, and stakeholder engagement to clarify responsibilities and legal obligations. Working closely with both the Security and Health & Safety teams ensured alignment and transparency throughout delivery.

Effective live service management is critical to ensuring operational continuity, user satisfaction, and the reliable performance of digital systems.

We support organisations in stabilising, optimising, and evolving their live service, whether transitioning from legacy platforms, improving data reporting, or delivering day-to-day service support. We embed experienced ITSM consultants who work closely with your teams to deliver immediate value while building capability for long-term service excellence.

Key Services:

Data Migration

We plan and execute secure, accurate data transfers from legacy to new systems, minimising disruption and ensuring data integrity.

Improved Data Reporting

Data reports can effectively communicate information and insights to stakeholders to aid decision making. Our consultants utilise tools such as Power BI and Tableau to convert raw data into clear and actionable insight.

IT Change Management

IT transformations should be delivered smoothly with minimal disruption, we establish structured processes to plan, manage and implement changes with clear governance, risk mitigation and engagement with users.

Service Optimisation

We assess existing live services and implement improvements to enhance efficiency, user experience, and performance outcomes.

Case Study

Defence Digital, Ministry of Defence

Strategic Command
Defence Digital

Duration

2 years

Scope

Data Reporting and Asset Visibility for Ministry of Defence Digital Devices

Challenge

Defence Digital needed to significantly improve how it captured and reported data on digital device usage across its estate, covering both military and civilian personnel. Legacy systems generated inconsistent and fragmented data, making it difficult for senior leaders to gain meaningful insight into how digital assets were distributed and used across the armed forces.

Action

RT Consulting worked closely with stakeholders to understand the specific information needs of senior leadership. We analysed data across multiple legacy systems, identified gaps and inconsistencies, and developed a tailored solution to convert raw data into actionable insight. This included the design and implementation of fully automated Power BI dashboards and reporting tools that provided ongoing visibility into device usage.

Result: Strategic Planning Enabled

For the first time, MOD leadership gained a consolidated view of digital device distribution and usage across services. The automated dashboards enabled evidence-based decision-making, allowing better asset management and more strategic planning of digital capability across the estate.

Budget accountability and scrutiny across the government, defence, and public sectors means organisations must have confidence that programme and project costs represent true value.

RT Consulting provides independent cost assurance to help clients validate assumptions, identify inefficiencies, and support better-informed commercial decisions. Our approach blends deep technical knowledge with commercial acumen, ensuring transparency, improving cost control, and strengthening confidence across stakeholders.

Key Services:

Independent Cost Reviews

We conduct rigorous assessments of supplier costings and pricing assumptions to confirm accuracy, realism, and value for money.

Benchmarking & Analysis

We compare proposed and actual costs against historical and industry benchmarks to identify anomalies or areas of potential optimisation.

Financial Modelling & Validation

We build and test cost models to ensure they reflect programme realities, risks, and financial governance expectations.

Commercial Negotiation Support

As the customer friend we assess and provide data-driven insights to strengthen negotiations and work with organisations to secure fair commercial outcomes.

Duration

1 year

Scope

Cost efficiency and feasibility assessment for HAWK Adour 151, for continued operation of the Red Arrows Fleet

Challenge

RT Consulting was commissioned to explore cost-saving opportunities through the reuse of retired HAWK T1 aircraft engines to support the Red Arrows fleet. With all other T1 aircraft decommissioned, the focus was on extending the operational life of the remaining fleet through a Reduce to Produce (RTP) strategy—repurposing whole engines or components for continued use.

Action

We developed a top-level demand model, assessed engine and module availability, and analysed historical cost data to support sustainability planning through to 2030 and 2035. This work provided the MOD with a clearer view of long-term engine requirements and informed decision-making on cost-effective maintenance and reuse strategies.

Result: £14m Savings Identified

The study identified potential savings of up to £14M over 12 years through strategic RTP activity. It also highlighted key shortfalls in engine module availability, informing future repair and supply planning.

Balancing environmental, social, and economic priorities is now fundamental for future-focused public sector delivery.

RT Consulting provides expert support for sustainability and ESG initiatives, in compliance with all environmental legislation. By aligning strategy with policy and values, we are committed to providing a quality service and drive positive change that supports both organisational goals and long-term planetary health.

Key Services:

Sustainability Strategy Development

Tailored strategies are developed to integrate environmental, social, and governance (ESG) principles into organisational plans, ensuring alignment with Government policy, stakeholder expectations, and long-term impact goals.

ESG Reporting & Compliance

We provide support to help meet regulatory and stakeholder ESG reporting requirements, using structured frameworks and transparent metrics to evidence progress and accountability.

Carbon Footprint & Reduction Planning

We assess emissions data to identify baselines, hotspots, and opportunities, enabling the development of actionable plans for reducing environmental impact and achieving net zero targets.

Sustainable Procurement Advisory

Procurement practices are reviewed and enhanced to support sustainability goals, promoting ethical sourcing, supplier responsibility, and circular economy principles.

Contact Our Team →

“Working across Government, RT Consulting is aligned to the 25-year plan focused on improving the environment; enhance biodiversity, improve air and water quality, and reduce waste. With the core of our engagement into the Ministry of Defence, we are focused on their sustainability strategy of reducing environmental impact and enhancing operational resilience. In this our consultants will ensure their initiatives include the integration of environmental, social, and governance (ESG) principles into core operations, aiming to minimise negative impacts and create long-term value.”

James Ivimey

Business Development Manager &
Sustainability Champion

Delivery Models

At RT Consulting, we understand that no two programmes are the same. That's why we offer a range of flexible delivery models designed to complement the needs of our partners and customers.

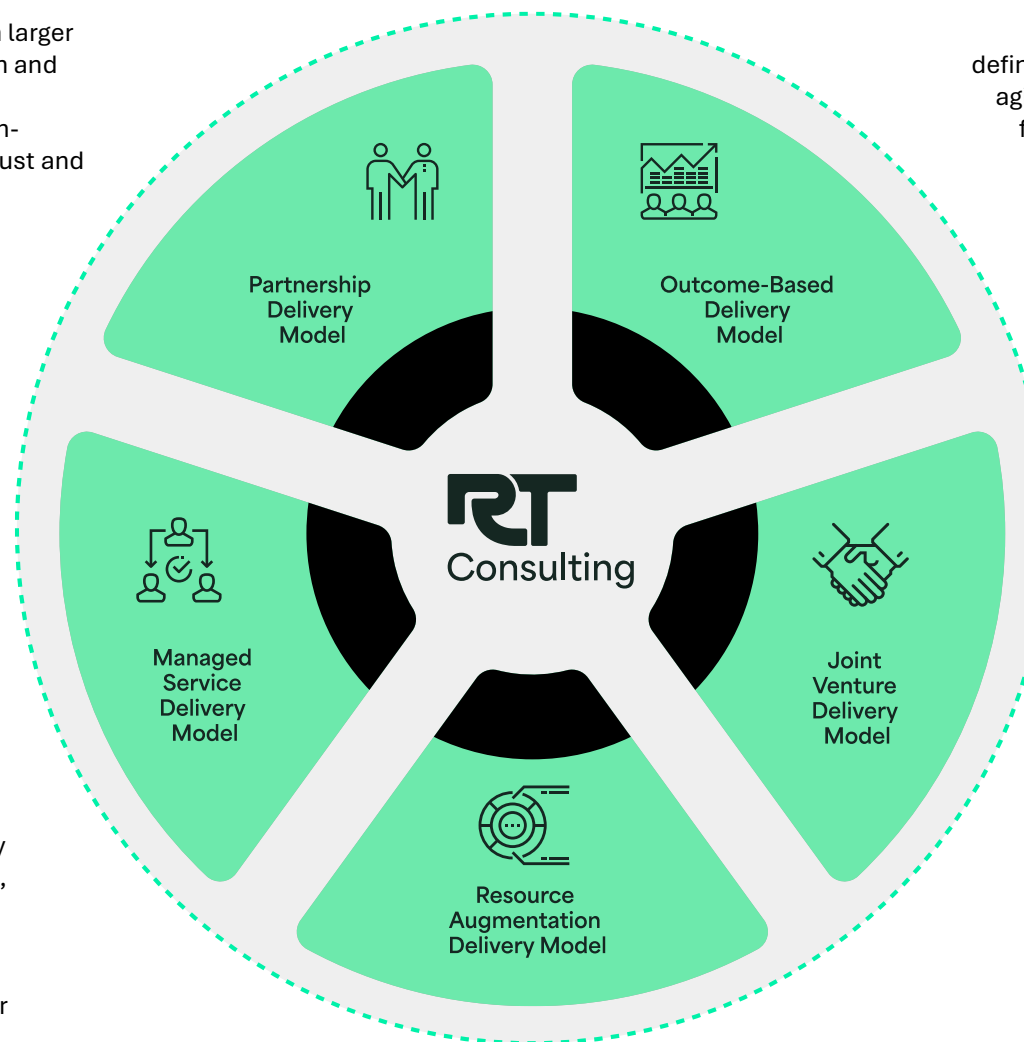

Whether you require outcome ownership, specialist expertise or long-term collaboration, our models are built to drive value, reduce risk and deliver lasting impact.

Partnership Delivery Model

As an SME, collaborate with larger firms and SMEs to co-design and deliver tailored solutions, combining strengths for high-quality outcomes built on trust and flexibility.

Outcome-Based Delivery Model

We work with the customer to define success up front and deploy agile and focused teams who are fully accountable for delivering measurable aligned results.

Managed Service Partner Delivery Model

We lead full-service delivery with high-performing teams, combining accountability, adaptability, delivery assurance and collaboration with customer teams to drive lasting impact.

Joint Venture Delivery Model

Ideal for complex or long-term programmes and rooted in collaboration, we share delivery responsibility, governance, and outcomes scaling with agility and trust.

Resource Augmentation Delivery Model

We provide rapid access to trusted consultants with the ability to adapt to changing client needs, integrating seamlessly to co-deliver alongside existing consultancy partners.
