Mendix Cloud Dedicated

Get our Cloud: Deploy apps on Mendix Cloud running in a dedicated single tenant AWS VPC hosted and operated by Mendix in Mendix's AWS account.

Mendix Cloud Dedicated ¹⁸⁾	
Mendix Cloud Dedicated in single tenant AWS VPC	
Mendix Cloud Foundry Cluster	£283,500

Mendix for Private Cloud

Bring your own cloud: Deploy apps on a Kubernetes-based (Virtual) Private Cloud operated by customer. Mendix supports AWS EKS, Azure AKS, Google GKS, and RedHat OpenShift.

Mendix for Private Cloud	
Mendix for Private Cloud	
Mendix for Private Cloud (incl. 3 environments)	£5,040
Mendix for Private Cloud Environments ¹⁹⁾	
Up to 50	£441
51 to 100	£315
101 to 150	£189
From 151	Free

Mendix for SAP BTP Deployment

Use SAP's Cloud: Deploy apps on SAP Business Technology Platform (BTP) operated by SAP.

Mendix for SAP BTP Deployment	
Support Fee	
Per application	£5,040
Unlimited applications	£25,200

Mendix for Server-based Deployment

Bring your own infrastructure: Deploy apps on Windows or Linux servers / VMs / Docker containers operated by customer.

Mendix for Server-based Deployment	
Support Fee ²⁰⁾	
Per application	£5,040
Unlimited applications	£25,200

Platform Add-ons

Private Mendix Platform (PMP)

Private Mendix Platform provides a subset of Mendix platform services running standalone on a Kubernetes cluster in a customer's private cloud. Mendix Private Platform includes the Mendix for Private Cloud Deployment option for unlimited environments.

Private Mendix Platform ²¹⁾		
	Select for Mendix Platform + Users net ACV	Price
PMP - S	≤ £480,000	£144,000
PMP - M	> £480,000 and ≤ £980,000	£252,000
PMP - L	> £980,000 and ≤ £1,500,000	£360,000
PMP - XL	> £1,500,000	£480,000

Mendix Cloud Event Broker

Mendix Cloud Event Broker is a Kafka-based broker running as a managed service on Mendix Cloud.

Mendix Cloud Event Broker Resource Packs ²²⁾

Mendix Quality & Security Management (QSM)

QSM provides insight in quality and security of Mendix applications based on static analysis of application models.

Mendix Quality & Security Management ²⁴⁾		
	Select for Mendix Platform + Users net ACV	Price
QSM - S	≤ £240.000	£26,460
QSM - M	> £240.000 and ≤ £480.000	£52,920
QSM - L	> £480.000 and ≤ £760.000	£79,380
QSM - XL	> £760.000 and ≤ £980.000	£105,840
QSM - XXL	> £980.000	£132,300
Mendix QSM Enablement Package (Mandatory)		£7,875

Deal Structures

Ramp Structure

A ramp structure is allowed as a deal structure where a customer buys a platform for a certain number of users and needs a ramp to justify the investment vs the value they get from the platform in the first year. Prerequisite is that the customer commits to a 3-year contract term. Two scenarios are available for multi-year contracts:

- 1-Year Ramp: Customer pays 50% of the platform price in year 1 and the full price in year 2 and 3.
- 2-Year Ramp: Customer pays 40% of the platform price in year 1, 70% of the platform price in year 2 and the full price in year 3 and later.

Notes:

- 1) Basic is intended to be sold online, not by Mendix sales teams.
- 2) Refers to server-based deployment of the Mendix Runtime Engine on-premises. Platform services like the Developer Portal, Cloud Portal, (Private) Marketplace, and Team Server are provided as a hosted solution.
- 3) This includes an environment running locally on developer machine.
- 4) 99.95% uptime guarantee applies for applications with fallback and horizontal scaling configured in Mendix Cloud V4. Without fallback and horizontal scaling configured the uptime guarantee is 99.5%.
- 5) Mendix Environments are included in Cloud Resource Packs on Mendix Cloud and Mendix Cloud Dedicated. For pricing of Mendix Environments for alternative cloud deployment see Mendix for Private Cloud price list.
- 6) Scaling is possible within boundaries of a Cloud Resource Pack size, provisioned for the application. For alternative cloud deployment, customer should use scaling mechanism in target platform.
- 7) Only available on Mendix Cloud. Requires buying Mendix Cloud Premium Resource Packs. For alternative cloud deployment, customer should use fallback mechanism in target platform.
- 8) Only available on Mendix Cloud. Requires buying Mendix Cloud Premium Plus Resource Packs. For alternative cloud deployment, customer should use multi-region failover mechanism in target platform.
- 9) Calculating List Price for licensed users – If for example a customer wants 6,000 Single App Internal Users, the first 500 users cost £126.00 each, the next 4,500 users cost £12.60 each, and the final 1,000 users cost £1.32.
- 10) An Internal User is a named user who is an employee or contractor of the organization subscribing to the Mendix Platform.
- 11) An External User is a named user who is not an employee or contractor of the organization subscribing to the Mendix Platform.
- 12) Total capped price for unlimited external users, which takes place once customer hits 500k users, is £200,220. However, in cases of high value external use case, we may explore charging for users after 500k users. Consult deal desk in these cases.
- 13) Mendix Cloud Standard can be purchased along with Standard and Premium platform packages.
- 14) Mendix Cloud Premium can be purchased along with Premium platform package only.
- 15) Fallback is configured for availability zones in physically distinct datacenters within the same region. This includes data replication and real-time backup.
- 16) Mendix Cloud Premium Plus can be purchased along with Premium platform package only.
- 17) Failover is configured across different AWS regions per customer's selection. This includes data replication and real-time backup.
- 18) Mendix Cloud Dedicated is a single tenant instance of Mendix Cloud running in a dedicated AWS VPC hosted and operated by Mendix in Mendix's AWS account. In addition to Mendix Cloud Dedicated, customers should buy Mendix Cloud Resource Packs to run their apps.
- 19) The pricing for Mendix for Private Cloud Environments is tiered. Customers will get reduced fee for next number of environments once they've reached the threshold.
- 20) This fee is for platform support in addition to license fee. For deployment scenarios where one and the same application is replicated to run distributed (e.g. on vessels, edge devices), the support fee will be charged for a single instance of the application, provided that the RAM for the production environment does not exceed 4 GB.
- 21) Private Mendix Cloud can be purchased along with Premium Platform Package. The enablement package is mandatory.
- 22) Only available on Mendix Cloud.
- 23) Mendix Advanced Audit Trail can be purchased by customers on Mendix Cloud or Mendix for Private Cloud. Customers on Mendix Cloud should purchase a Mendix Cloud Advanced Audit Trail Resource Pack. Customers on Mendix for Private Cloud should furnish the prescribed technology and compute resources themselves. The enablement package is mandatory.
- 24) QSM is delivered by Mendix partner SiG. The enablement package is mandatory.
