Companies work smarter with Loom

Loom's enterprise-grade platform lets organizations securely communicate using async video.

 **Contact Sales**

Enterprise-grade data protection

Loom protects any and all data on our platform, so you can communicate confidently.

 GDPR, CCPA, and SOC 2 Type 2 compliant

 Built on the AWS-backbone with secure and reliable infrastructure

 Equipped with advanced admin controls to protect sensitive information internally

 Secured with encrypted data and industry-standard security frameworks

Communicate faster with async video

Async video helps organizations communicate faster & build culture.

Save time

Teams can communicate more efficiently without typing long emails, scheduling meetings, or trying to work across time zones.

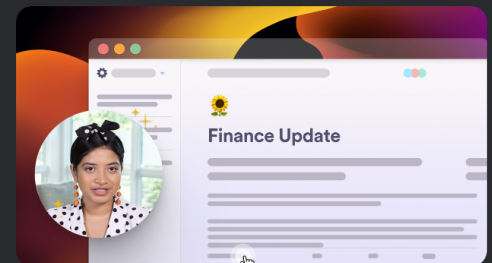

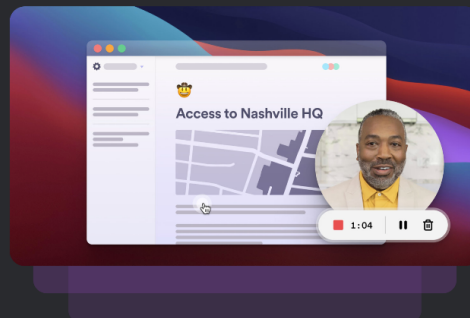

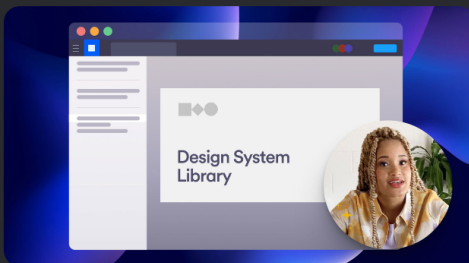

Communicate clearly

Async video captures context, tone, and personality in detail. Distributed teams can preserve the true meaning of their message.

Deepen culture

Make it effortless for anyone in your organization to share ideas, introduce themselves, and build community with fellow teammates using async video.

Drive community and visibility at scale

Scale knowledge with video

Connect pockets of institutional knowledge by making video messages searchable and discoverable.

Create a culture of sharing

Video messaging encourages your team to share early and often so projects are visible and driven to completion quicker.

Build community at scale

Magnify people's voices so the whole company can feel connected and heard beyond the boundaries of their team.

Loom meets your teams where they're at

Share Loom videos anywhere with a link

Our patented technology gives users the ability to hit record and share a video link in any tool they're already using.

Supercharges mission-critical tools

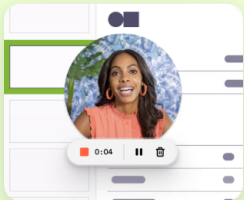

Loom's integrations give your team the ability to using async video in their favorite tools, without breaking their workflow.

Enhances internal systems

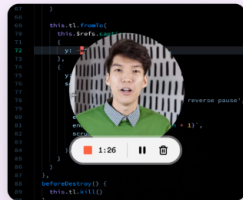

Integrate Loom's best-of-breed recorder & player into custom intranets and apps to add async video to internal systems.

Video messaging for all use cases

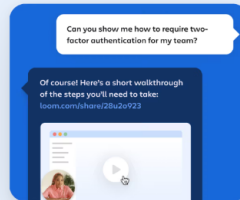

Sales

Personalize your pitch with video outreach to close more deals.

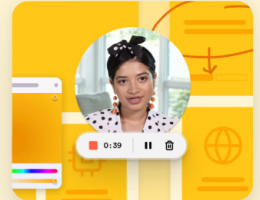

Engineering

Add visual context to your code to accelerate your sprints.
